QB + FastField Master Build Gameplan

Priority-ordered, interconnection-aware build roadmap — all 91 SOPs mapped to workflows, waves, and shared data architecture

DOCUMENT	VERSION	PREPARED	OWNER	STATUS
parakeet_master_build_gameplan_v1.0	1.0 — Working Draft	August 2026	Austin — CEO / Owner	◯ Active Planning

TABLE OF CONTENTS

1. Executive Summary
2. Foundation Principles — Why Order Matters
3. Current State — What's Already Specced
4. Shared Reference Tables (Pre-Work)
5. Build Wave Plan (Waves 0–8)
6. Full SOP-to-Workflow Mapping (91 SOPs)
7. Interconnection & Dependency Map
8. Open Items & Decisions Needed
9. Appendix: Full Workflow Registry

1. Executive Summary

91	46	5	9	5
TOTAL SOPS	QB WORKFLOWS	ALREADY SPECCED	BUILD WAVES	SHARED TABLES (PRE-BUILD)

This gameplan organizes all 91 Parakeet Communities SOPs into a sequenced, interconnection-aware build roadmap for the QB + FastField operational OS. It extends the approach established in WF001–WF003 (Home Ordering, Rehab, Disposition Review) across the full operational surface area — from resident move-in to eviction, from acquisitions to accounting, from field inspections to legal compliance.

The document answers three questions that an ad hoc sprint approach would not:

- **What shared data tables must exist before any dependent workflow is built** — so you never have to rebuild a workflow because its data model wasn't ready (the most expensive mistake in QB builds).
- **Which workflows must precede others** — because workflow B pulls records created by workflow A, or workflow B's automation fires based on a status set by workflow A.
- **What requires a FastField form vs. what lives entirely in QB** — so field staff have exactly the tools they need, and the back-office team has everything automated behind the scenes.

✓ WHAT'S ALREADY DONE (WAVE 0)

5 workflows are already specced and represent the first deployable layer of the OS: WF001 Home Ordering (LOCKED v1.2), WF002 Rehab (LOCKED v1.3), WF003 Disposition Review (LOCKED v1.1), WF004 Move Out (DRAFT v1.0), and WF006 Listings (DRAFT v1.0). These represent approximately $3M–$5M in annual asset movement handled by the system.

⚠ CRITICAL PRE-WORK BEFORE ANY NEW BUILD

Before Waves 1–8 can begin, **five shared QB reference tables must be built first**. Without them, every downstream workflow will be designed around missing data and will require retroactive rebuilding. This pre-work is estimated to take 1–2 weeks but prevents 3–6 weeks of rework later. See Section 4.

ⓘ HOW TO USE THIS DOCUMENT

Work through the waves in order. Each wave section identifies: which SOP(s) it covers, what WF number it is assigned, whether it needs a FastField form, what QB tables it reads from and writes to, what automations it fires, and what decisions are needed before speccing can begin. The full SOP-to-WF mapping table in Section 6 is the master reference for all 91 SOPs.

2. Foundation Principles — Why Order Matters

Principle 1: Shared Tables First, Workflows Second

Every QB workflow either *creates* records in shared tables or *reads* records from them. If you build WF019 (Eviction Pipeline) before WF005 (Move In) creates Resident records, the eviction workflow has nothing to look up. You cannot auto-populate "resident name," "lease start date," or "community" — the very fields that make automation possible instead of just digital paperwork.

The rule: **shared tables and the workflows that populate them must be built before any workflow that reads from them**. This is why the Residents table, Lease Records table, and Work Orders table are pre-work, not Wave 1 tasks.

Principle 2: Revenue Protection Before Operations Optimization

Collections, Stipulations, and the Eviction Pipeline are Wave 2 — right after the resident lifecycle workflows that create the data. A single 30-day delay in an eviction pipeline due to missing documentation or missed cure period deadlines can cost $1,500–$3,000 in lost rent plus legal fees. The system needs to protect revenue before it optimizes field operations.

Principle 3: State-Specific Rules Are Not Edge Cases

Parakeet operates in 8 states (AL, FL, GA, MA, MI, NC, SC, WV). FL Chapter 723 lot rent increase rules, MA's 30-day eviction notice requirement, and GA's 60-day rent increase notice are *hard deadlines* — not preferences. Any workflow that touches rent increases, evictions, or lease renewals must encode state-specific logic as QB conditional rules or automation triggers. This is not optional and must be designed in from the start.

Principle 4: FastField = Field Capture, QB = Workflow Engine, RM = System of Record

This three-system architecture was established in WF001 and governs every subsequent workflow:

- **FastField:** Any form completed by a CM or field staff person on-site or on a mobile device. Condition inspections, move-in/move-out reports, site visit checklists, utility verification. FastField handles the data collection; QB handles the resulting workflow steps.
- **QB:** Workflow stages, gate rules, automations, approval routing, record creation, and reporting. QB never replaces RM — it operates in the gaps between RM capabilities and field reality.
- **RM (Rent Manager):** Financial ledger, charge schedules, lease records, security deposits. QB may display RM data for context but never writes financial records to RM directly — all RM updates flow through the daily batch CSV sync at 6 PM ET.

Principle 5: No Rebuild Debt

Rebuild debt is what happens when a workflow is designed in isolation and later needs to be rewired because a dependency wasn't anticipated. Examples of rebuild debt to avoid:

- Building Eviction (WF019) before Residents table → must rebuild the lookup relationships later
- Building Collections (WF017) without Lease Records → can't auto-pull balance due or cure period deadline
- Building Utility Activation (WF027) without community-level Utility Accounts table → can't auto-assign utility provider
- Building Rent Increase (WF021) without state field in community record → can't apply state-specific notice requirements

The wave sequencing in this document is designed specifically to prevent these scenarios.

---

3. Current State — What's Already Specced (Wave 0)

The following workflows have completed specification documents. WF001–WF003 are locked and ready to build. WF004 and WF006 are in draft status with open items that need resolution before those specs can be locked.

WF #	WORKFLOW NAME	SOP(S)	VERSION	STATUS	QB TABLES	FASTFIELD FORMS	OUTSTANDING
WF001	**Home Ordering, Delivery & Set**	001	v1.2	✓ LOCKED	7 tables (Home Orders, Delivery, Construction Inspection, Ops Readiness, Communities, Lots, Vendors)	4 forms (Home Order Request, Construction Inspection, Ops & Sales Readiness, Utility Verification)	None – ready to build
WF002	**Rehab**	105a/b	v1.3	✓ LOCKED	5 tables (Rehab Records, Rehab Tasks, Budget Line Items, Vendors, Communities)	1 form (Rehab Walkthrough Punchlist)	None – ready to build
WF003	**Asset Disposition Review**	104	v1.1	✓ LOCKED	2 tables (Disposition Meeting Records, Disposition Items)	None (QB-only)	None – ready to build
WF004	**Move Out**	102	v1.0	○ DRAFT	2 tables (Move Out Records, Move Out Inspections)	2 forms (Move Out Form w/ Regional approval; Move Out Inspection)	5 open items (O-WF004-001 through 005): RM CSV mapping, inspection checklist items, FastField approval routing, SharePoint path,

							rejected form SLA
WF006	Listings	002/003	v1.0	○ DRAFT	2 tables (Listing Records, Price History)	1 form (Listing Request Form)	5 open items (O-WF006-001 through 005): listing platforms, RM UDF field names, RM status values, SharePoint folder structure, listing review SLA

⚠ WF004 & WF006: LOCK THESE BEFORE WAVE 1 BEGINS

WF004 (Move Out) feeds directly into Wave 1 (Move In — the Residents table). And WF006 (Listings) feeds into Wave 3 (Offer to Purchase / WF007). Both specs need their open items resolved and locked before the next wave can be fully designed. The 10 combined open items are documented in Section 8.

4. Shared Reference Tables — Pre-Work (Must Build Before Wave 1)

These five QB tables are read by **three or more workflows each**. Building them once, correctly, before any downstream workflow is specced prevents the most common and expensive form of rebuild debt. These are not workflow tables — they are the data foundation the entire OS sits on.

👥 Residents Table

CRITICAL — Build First

Master registry of all current and former residents across all 68 communities. One record per resident. This is the single most important missing table in the current QB build.

Core Fields: Resident ID (RES-YYYY-###), Full Name, Community (lookup), Lot # (lookup), RM Resident ID, Phone, Email, Status (Active / Former / Evicted / Deceased), Move-In Date, Expected Move-Out Date, Resident Type (POH Owner / Rental / LTP / RTO / Promissory Note)

Feeds Into: WF005 Move In, WF004 Move Out, WF016 Lease Renewal, WF017 Collections, WF018 Stipulation, WF019 Eviction, WF020 Post-Eviction Title, WF021 Rent Increase, WF028 Rental Inspections, WF013 Incident Report, WF029 Violations — *21 workflows total*

RM Sync: Resident records originate in RM; QB Residents table imports via daily batch CSV. QB writes back status changes via automation (not manually).

📃 Lease Records Table

CRITICAL — Build With Residents

One record per active or historical lease. Tracks lease type, term, rent amount, renewal status, and expiration date. Required for Collections, Eviction, and Lease Renewal to auto-populate key dates and amounts.

Core Fields: Lease ID (LS-YYYY-###), Resident (lookup → Residents), Community (lookup), Lot #, Lease Type (Standard / LTP / Rental / RTO), Monthly Rent, Lease Start, Lease End, State (FL/GA/SC/MA/NC/AL/MI/WV), Status (Active / Expired / Month-to-Month / Evicted / Renewed), RM Charge Schedule ID

Feeds Into: WF004 Move Out (lease end date), WF005 Move In (creates record), WF016 Lease Renewal (trigger + notice period calc), WF017 Collections (balance due + state cure period), WF018 Stipulation (payment plan terms), WF019 Eviction (lease type determines POH vs rental path), WF021 Rent Increase (state-specific notice period) — *12 workflows total*

State Logic Required: Cure period by state (FL: 5 bd, SC: 5 days, GA: 3 bd, NC: 10 days, MA: 30 days) must be stored or derivable from the State field on the Lease record.

🔨 Work Orders Table

HIGH PRIORITY

Master log of all maintenance, repair, and infrastructure work orders across all communities. Shared by Site Visit Follow-Up, Rental Inspections, and Month-End reporting.

Core Fields: Work Order ID (WO-YYYY-###), Community (lookup), Lot # (optional lookup), Category (Electrical / Plumbing / HVAC / Grounds / Infrastructure / General), Description, Priority (Emergency / Urgent / Standard), Status (Open / In Progress / Complete / Deferred), Assigned To (vendor or staff), Date Opened, Date Completed, Cost

Feeds Into: WF008 Site Visit Inspection (generates WOs), WF009 Weekly Maintenance, WF010 Monthly Equipment, WF028 Rental Inspections (generates WOs on fails), WF011 Month End (open WO count), WF029 Violations (WO may accompany notice) — *6 workflows total*

🏠 Title & Document Records Table

HIGH PRIORITY

Tracks the chain of title for all community-owned homes (POH) and homes in process. Required before any title transfer workflow can be built. Prevents duplicate records and conflicting title actions on the same asset.

Core Fields: Title Record ID (TTL-YYYY-###), Asset / Home (lookup → Lots), Current Owner (Parakeet / Resident / Lender / Estate), Title Status (Clear / Pending Transfer / Liened / Deceased Owner / In Process), HUD Label #, Serial Number, Year, Make/Model, State, County, Legal Description, Current Lender (if liened), Attorney File # (Vector Law / FL Fast Title)

Feeds Into: WF020 Post-Eviction Title, WF022 Home Closing, WF023 POH Sales Title Transfer, WF024 Asset Title Transfer, WF005 Move In (closing docs), WF039 Acquisitions Transition — *8 workflows total*

⚡ Utility Accounts Table

HIGH PRIORITY

Registry of all utility accounts at the community level (electric, water/sewer, gas, trash) and lot level where individual metering applies. Required before any utility activation or transfer workflow can be built.

Core Fields: Utility Account ID (UTL-YYYY-###), Community (lookup), Lot # (optional), Utility Type (Electric / Water / Sewer / Gas / Trash / Submetered), Provider Name, Account Number, Account Holder (Parakeet / Resident), Status (Active / Inactive / Pending), Billing Type (Master-metered / Individual / RUBS / Sub-metered), Setup Date

Feeds Into: WF005 Move In (utility transfer to resident), WF004 Move Out (utility transfer back to Parakeet), WF027 Utility Activation New Home, WF027 Utility Activation Rehab, WF035 Utility Recapture Reporting, WF040 Utility Onboarding Acquisitions — *7 workflows total*

5. Build Wave Plan — Waves 0 Through 8

WAVE SEQUENCING LOGIC

Waves are ordered by data dependency first, business criticality second. A workflow in Wave 3 cannot be specced until all Wave 1 and Wave 2 workflows are at least in draft, because Wave 3 workflows reference records created by Wave 1–2. Within each wave, workflows can be specced in parallel. Waves are not calendar weeks — they are logical dependency layers. Expect 2–4 weeks per wave depending on complexity and available input from Operations, Legal, and Accounting.

WAVE
0

Already Specced — In Progress

5 workflows • WF001–WF004, WF006 • 3 LOCKED, 2 DRAFT

The foundation layer. Covers the asset delivery-to-listing pipeline and the move-out handoff. These were prioritized correctly: WF001 (ordering) and WF002 (rehab) generate the assets that WF003 decides on, WF006 lists, and WF004 closes out when a resident leaves. Lock WF004 and WF006 before advancing.

WF001	**Home Ordering, Delivery & Set**	SOP 001 • 12 stages • 4 FastField forms • 14 automations	LOCKED v1.2
WF002	**Rehab**	SOP 105a/b • 9 stages • 1 FastField form • 12 automations • Bid approval tiers confirmed	LOCKED v1.3
WF003	**Asset Disposition Review (TBD)**	SOP 104 • 2 QB tables • QB-only • Weekly Monday meeting trigger	LOCKED v1.1
WF004	**Move Out**	SOP 102 • 2 QB tables • 2 FastField forms (CM + Regional approval) • 48-hr inspection SLA • 5 open items	DRAFT v1.0
WF006	**Listings**	SOP 002/003 • 2 QB tables • 1 FastField form • Leslie & Tanya as listing team • 5 open items	DRAFT v1.0

WAVE 1

Resident Lifecycle Core

3 workflows • WF005, WF015, WF016 • Highest daily frequency • Creates all resident records

Wave 1 is the most important wave in the entire build, because it establishes the Residents table and Lease Records table that every subsequent resident-facing workflow depends on. Move In creates the Resident record. Lease Renewal updates it. Resident Info Sheet captures the onboarding profile. Without Wave 1, Waves 2–5 have no resident data to automate against. ***Dependency: 5 shared foundation tables from pre-work must be complete before Wave 1 spec begins.***

WF005	**Move In**	SOP 103 • Two paths: POH Owner vs. Rental/Community-Owned • FastField Move-In Condition Report • Creates Resident record + Lease record in QB • Triggers Utility Transfer automation • Uploads lease & closing docs to SharePoint • RM sync: daily batch (charge schedule, deposit)	NEW FastField
WF015	**Resident Information Sheet**	SOP 105 (Handoff) • FastField form capturing resident profile at move-in: vehicle info, pets, emergency contacts, communication preferences • Feeds Residents table • Replaces paper onboarding packet • Connects to Violations,	

	Incident Report, and Lease Renewal workflows	NEW FastField		
WF016	Lease Renewal Process	SOP 101 • Asset Mgmt issues notices (FL/SC: 90 days, GA/MA/NC: 60 days) • CM generates via RM Express “Renew Lease” (NOT “New Lease”) • Digital (e-sig) or manual path • MA: extra 72-hr disclosure package required • QB tracks renewal status & notice period compliance • If resident states intent to vacate: triggers WF004 Move Out • Asset Mgmt updates billing schedule post-activation	NEW QB-Only	

WAVE 2

Revenue Protection

5 workflows • WF017–WF021 • Highest financial impact • Depends on Wave 1 Residents + Lease Records

The revenue protection pipeline covers the full arc from late payment to eviction to title recovery and rent increase compliance. This wave has the highest financial impact per workflow of any wave: a single missed cure period can cost $2,000–$5,000; a missed rent increase notice can cost $15,000+/year in FL alone at scale. State-specific logic for all 8 states must be built in from day one — no retrofitting. ***Dependency: Wave 1 complete (Residents + Lease Records tables populated).***

WF017	**Collections / AR**	SOP 100 • Monthly cadence, 8 steps • CM/DM, Ops Coordinator, Regional Manager, DOO (Natalie) roles • Demand notices by state: FL 5 bd, SC 5 days, GA 3 bd, NC 10 days, MA 30 days • QB auto-calculates cure period deadline from state on Lease record • UPS certified mail via Melanie (Ops Coordinator) • If cured: record closed; if not: triggers WF018 or WF019 • Stipulation Agreement requires Regional Manager approval only	NEW QB-Only

WF018	Stipulation Process	SOP 118 • Payment plan agreement when resident cannot pay in full • Regional Manager approval required • QB tracks payment schedule compliance • Missed payment auto-triggers escalation • If compliant: record closed; if defaulted: triggers WF019 Eviction • Connects to Lease Records (for terms) and Residents (for history)	NEW QB-Only
WF019	Eviction Pipeline	SOP 800 • 5 phases, 27 steps • Roles: CM/DM, Evictions Team (evictions@parakeetcommunities.com), Regional Manager, DOO (Natalie), Asset Mgmt (Justin), Attorney (Vector Law for liened / FL Fast Title for non-liened) • POH vs. rental path diverge post-filing • Writ → Home Inspection → Auction → Title	

		Transfer path • Post-writ: triggers WF020 Post-Eviction Title • QB tracks filing dates, hearing dates, writ dates by state • Lot Status auto-updates to Lot-Evicted or Lot-Evicted (Rental) via automation	NEW QB-Only
WF020	Post-Eviction Title Process	SOP 805 • Triggered by WF019 when writ of possession granted on POH home • Depends on: Title Records table (existing lien status), Asset Mgmt (Justin) for title processing • Paths: liened (Vector Law) vs. non-liened (FL Fast Title) • Connects to WF003 Disposition Review once title clears • QB tracks title status through Title Records table	NEW QB-Only
WF021	Rent Increase & Tax Pass-Throughs	SOP 806 • State-specific notice requirements: FL Ch. 723 (90-day, prospectus may need amending), GA (60-day), MA (most restrictive — landlord-tenant law governs), NC/SC	

(60-day) • QB auto-calculates notice deadline from current date + state rule • Tracks annual tax pass-through calculations by community • RM billing schedule updated post-approval • Regional Manager approval required before notices sent

NEW QB-Only

WAVE 3

Asset Sales Pipeline

4 workflows • WF007, WF022–WF024 • Completes the listing-to-closed arc • Depends on WF006 Listings

WF006 (Listings) ends when an offer is received. Wave 3 picks up from that point and carries the deal through offer, closing, and title transfer. These workflows also handle the homeowner-title-transfer scenario (POH resident purchases their lot-rented home) and asset-level title corrections. ***Dependency: WF006 locked and WF002 (Rehab) complete; Title Records table built in pre-work.***

WF007	**Offer to Purchase / Rent**	SOP 002 (expanded) • Triggered by WF006 when offer received; WF006 locks into "Pending Offer" • Tracks offer terms, financing type (cash / dealer loan / in-house loan), buyer background check (AMRENT) • Approved offer → triggers WF022 Home Closing • Rejected offer → WF006 returns to Active • Loan application path → WF045 Online Loan Application	NEW QB-Only
WF022	**Home Closing Process**	SOP 003 • Full closing checklist: title search, lien clearance, HUD label verification, settlement statement, deed/title preparation • Attorney coordination • QB tracks closing	

		milestones and document status • Closing package uploaded to SharePoint • Triggers WF023 (if POH sale) or WF005 Move In (if rental/LTP) • RM updated with sale record via daily batch	NEW QB-Only
WF023	**POH Sales Title Transfer**	SOP 005 • Specific to POH (Parakeet-owned home) sales where title transfers to buyer • Coordinates with Asset Mgmt (Justin) • Depends on: Title Records table (lien status, HUD label, serial number) • State DMV/HCD filings for manufactured home title • QB tracks submission and receipt of recorded title documents • Asset Status auto-updates to “Sold” on title confirmation	NEW QB-Only
WF024	**Asset Title Transfer & Title Work**	SOPs 801/808 • Handles all non-sale title transfers: estate titles, deceased	

owner titles, abandoned home titles, lender repo titles, and mid-portfolio title corrections • Requires Title Records table for chain-of-title tracking • Vector Law or FL Fast Title as applicable • QB tracks all document submissions and state agency responses • Asset Status updates via automation when title confirmed	NEW QB-Only	

WAVE 4

Field Operations & Construction

7 workflows • WF008–WF010, WF025–WF028 • Highest FastField usage • Depends on WF001/WF002 + Work Orders table

This wave covers what happens on the ground: site visits, rental inspections, utility activation, demolition, and lot preparation. These workflows generate the most FastField usage because CMs and construction staff are capturing data on-site. They also generate the most Work Orders, which feed into the Month-End close (Wave 6). ***Dependency: WF001/WF002 locked (for delivery and rehab references); Work Orders table and Utility Accounts table built in pre-work.***

WF008	**Community Site Visit Inspection**	SOP 117 / 106 • Regional Manager monthly site visit to each community • FastField checklist: grounds, signage, amenities, infrastructure, common areas, vendor work quality • Rating scale: Good / Monitor / Repair / N/A • Items rated “Repair” auto-generate Work Orders in QB • 30-day follow-up workflow triggered for open items • QB stores visit record; SharePoint receives PDF report • Connects to WF009/WF010 for maintenance

tracking		NEW FastField	
WF009	**Weekly Maintenance Checklist**	SOP 123 (Equipment & Inventory) • CM-completed FastField form weekly: pool/spa, gates, common area equipment, generator, water systems • Rating: Good / Monitor / Repair / N/A • Repair items auto-generate Work Orders • Connects to WF010 for monthly rollup • QB stores summary record per community per week	NEW FastField
WF010	**Monthly Equipment & Inventory**	SOP 123 (monthly variant) • CM-completed FastField form monthly: full equipment inventory count, PPE stock, chemical supplies, capital equipment condition • QB rolls up from weekly checklists • Flagged items auto-generate procurement or repair Work Orders • Feeds into WF011 Month	

	End reporting	NEW FastField	
WF025	Demo to Infill	SOP 200 • Triggered by WF003 when Disposition = Demo • 4 phases: Pre-Demo Approval, Demolition Execution, Lot Clearance, Infill Prep • Permit coordination by state • QB tracks all phases, costs, permit status • Lot Status auto-updates to “Lot-Demo” on initiation, “Lot-Not Ready” on demo completion, then transitions based on infill decision • Connects to WF026 (Lot Prep) and WF001 (new home ordering) on completion	NEW QB-Only
WF026	Lot Prep	SOP 205 • Lot preparation between home removal and new home delivery • Covers utility stub-outs, concrete pad, underpinning prep, ground leveling • FastField lot inspection form before and after • Feeds into WF001 Home Ordering (lot must be “Lot-Not Ready” → “Lot-Pending(POH)” cleared) •	

		QB tracks tasks, costs, and permit status by lot	NEW FastField
WF027	Utility Activation	SOP 303a (New Home) & 303b (Rehab) • Physical and account-level utility verification before any home goes live • FastField form: meter read, account activation confirmation, provider confirmation per utility type • Reads from Utility Accounts table • New Home path: triggered by WF001 Stage 8 (Utility Verification) • Rehab path: triggered by WF002 on completion • QB updates Utility Account record status to Active on confirmation	NEW FastField
WF028	Rental Inspections	SOP 116 • Annual or move-in/move-out inspection of rental homes (community-owned) • FastField checklist: interior (kitchen, bath, HVAC, appliances, flooring, walls), exterior (siding, skirting, steps, roof) • Rating: Excellent / Good / Fair / Poor / N/A (matching WF001 condition	

scale) • Items rated Poor or Fail auto-generate WF002 Rehab record OR Work Order depending on severity • QB tracks inspection record linked to Resident and Lot

NEW FastField

WAVE 5

Compliance & Legal

5 workflows • WF013, WF029–WF032 • Includes all state compliance SOPs • Can run in parallel with Wave 4

Compliance workflows are largely independent of resident data, making them a natural parallel track to Wave 4. The Violation Process (WF029) is the one exception — it reads Resident records — but can be designed in Wave 5 once Wave 1's Residents table is confirmed. License/Permit and Insurance renewals are calendar-triggered workflows, not event-triggered, so they are relatively simpler to build. ***Dependency: Residents table (for WF029 only); otherwise independent.***

WF013	**Incident Report**	SOP 108 / 125 • Covers property-level incidents: injuries, property damage, emergency infrastructure, break-ins, environmental • FastField form submitted by CM immediately at incident • Auto-routes to Regional Manager and DOO for review • QB tracks incident record, follow-up actions, insurance claim status • Elevated incidents auto-flag to legal team • Replaces JotForm incident reports • Connects to Work Orders for physical remediation	NEW FastField

WF029	Violation Process	SOP 809 • Covers lease and community rules violations: parking, pet, noise, property condition, unauthorized occupants • QB-only workflow (no FastField form needed — CM enters violation details in QB) • Notice generation and delivery tracking • Cure period tracking by violation type • Progressive discipline: 1st notice → 2nd notice → legal action • Reads Resident record and Lease record for contact info and lease terms • Connects to WF019 Eviction if uncured	NEW QB-Only
WF030	License & Permit Renewals	SOP 804 • Calendar-triggered workflow: annual MH community licenses, business licenses, pool permits, electrical permits, water/sewer permits by state • QB tracks renewal date, license number, issuing agency, responsible person, and status per community • Automations: 90-day, 60-day, 30-day, 14-day, and 7-day email reminders before expiration • Expired license = hard block flagged to	

	leadership		NEW QB-Only
WF031	Fair Housing & Annual Training Tracking	SOP 802 • Tracks annual Fair Housing training completion for all CMs, RMs, and staff • QB record per employee per year • Completion date, training provider, certificate number • Automations: 60-day reminder, 14-day escalation to HR if incomplete • Connects to HR onboarding (WF042) for new-hire training requirement	NEW QB-Only
WF032	Insurance Renewals	SOP 803 • Tracks all property and liability insurance policies by community • QB record per policy: carrier, policy number, coverage type, premium, expiration date • Automations: 90-day and 30-day reminders to Asset Management • Certificate of Insurance upload to SharePoint per renewal • Links to	

WF013 (Incident Report) for claims tracking

NEW QB-Only

WAVE 6

Accounting & Financial Operations

6 workflows • WF011, WF033–WF037 • Depends on Wave 1 (resident data) & Wave 3 (sale data)

Most accounting workflows need resident-level data (security deposits, utility recapture) or asset-sale data (WIP closeouts, lender repo) that comes from earlier waves. Month End Ops Close Out (WF011) is the integrating workflow — it reads from Work Orders (Wave 4), Listing Records (WF006), and Lease Records (Wave 1) to produce the monthly summary. Build Wave 6 once Wave 1 and Wave 3 are functional. ***Dependency: Waves 1, 3 in draft or complete. Note: RM remains the system of record for all financial data; QB tracks workflow status and triggers syncs.***

WF011	**Month End Ops Close Out**	SOP 110 • Monthly QB rollup: open Work Orders, active rehabs, listing status, move-in/move-out counts, eviction status, open collections • CM/RM/Regional sign-off on checklist items • Connects to Financial Reporting (WF037) • QB-only • Generates month-end summary record per community	NEW QB-Only
WF033	**AP / Avid Exchange Process**	SOPs 300/303 • Accounts payable workflow: invoice receipt, coding, approval routing, Avid Exchange submission • QB tracks invoice record: vendor, community, GL code, amount, approval status • Approval tiers: <$2,500.00 = Regional Manager; $2,500.00–$5,000.00 =	

		Director; >$5,000.00 = Austin • Approved invoices pushed to Avid Exchange queue • Reads Vendors reference table (from WF002 pre-work)	NEW QB-Only
WF034	Security Deposit Refund	SOP 312 • Triggered by WF004 Move Out when move-out is confirmed • RM = system of record for security deposit ledger • QB tracks refund request record: resident (lookup), deposit amount (from RM sync), deductions, final refund amount, approval status • Regional Manager approval required for deductions • State-specific refund timeline requirements (FL: 15 days if deductions; 30 days if full refund)	NEW QB-Only
WF035	Utility Recapture Reporting	SOPs 314/315 • Tracks utility billing vs. recapture from residents for sub-metered and RUBS communities • Reads Utility Accounts table for	

		account types and rates • QB produces monthly recapture report per community: total billed, total collected, variance • Flags communities where utility expenses exceed resident recapture • Connects to WF037 Financial Reporting	NEW QB-Only
WF036	Home Lender Repo Process	SOP 302 • Process when a resident defaults on their manufactured home loan (separate from lot rent) • Lender contacts Parakeet; Parakeet coordinates access • QB tracks repo notice date, lender contact, home status during repo • If Parakeet acquires title post-repo: triggers WF024 Title Transfer • If lender removes	

		home: triggers lot status update and WF025/WF001 path • Asset Mgmt (Justin) owns this process	NEW QB-Only
WF037	**Financial Reporting (P&L / Rent Roll / Quarterly)**	SOPs 307/309/311 • QB-level reporting dashboards pulling from: Lease Records (rent roll), Work Orders (maintenance costs), Rehab Records (capex), Listing Records (sales pipeline), Collections Records (delinquency) • Monthly P&L view per community • Quarterly summary for leadership • RM remains primary financial GL; QB provides operational-metric overlay • No financial data written to RM from this workflow	NEW QB-Only

WAVE 7

Acquisitions & New Community Onboarding

4 workflows • WF038–WF041 • Feeds all prior waves with new community data • Can begin speccing in parallel with Wave 5/6

Acquisitions workflows are standalone processes that bring new communities into the system — they don't depend on resident data the way operational workflows do. However, Utility Onboarding for acquisitions (WF040) must align with the Utility Accounts table design from the pre-work phase. And Acquisitions Transition (WF039) feeds ALL prior waves by populating Communities, Lots, and Residents records for newly acquired communities. Wave 7 can be designed in parallel with Waves 5–6 but should not be built before the shared tables are established.

WF038	**Due Diligence & Acquisition**	SOP 402 • Multi-department process: legal (title search, HUD label verification), finance (rent roll review, operating statements), construction (infrastructure audit), ops (management assessment) • QB tracks due diligence task list: status per department, outstanding items, key dates • FastField potential: on-site infrastructure inspection form (electric, water/sewer, roads) • Gate: DD cleared → Board/Austin approval → move to WF039	NEW FastField

WF039	Acquisitions Transition	SOP 401 • Full community takeover: staff, systems, residents, vendors • QB creates: new Community record, all Lot records, initial Resident records (from RM import), Utility Account records • FastField: transition inspection per lot • Connects to WF040 (utility onboarding), WF005 (resident move-in records for incoming residents), WF027 (utility activation per lot) • Most complex single workflow in the OS — touches every shared table	NEW FastField
WF040	Utility Onboarding (Acquisitions)	SOP 403 • MH-specific utility setup: sub-metering installation, master-metered conversion, RUBS calculation setup • Reads and populates Utility Accounts table for new community • QB tracks account transfer status per utility type per community • Coordinates with utility providers for account name changes • Connects to	

		WF027 (activation) and WF035 (recapture reporting setup)	NEW QB-Only	
WF041	**Acq-OPS Transition Recaps**	SOP 400 • Post-acquisition handoff documentation from Acquisitions team to Operations • QB record: 90-day recap of outstanding transition items, committed repairs, pending title issues, utility changes • Regional Manager assigned to new community at this stage • Connects to WF039 (source data) and WF008 (first site visit within 30 days of acquisition close)	NEW QB-Only	

WAVE 8

HR, Training & Operational Cadence

5 workflows • WF042–WF046 • Operational support layer • Does not block any prior wave

HR, training, and cadence workflows are the last wave because they support the team that runs the other workflows — they don't depend on any operational data and don't block any core process. However, Manager Onboarding (WF042) should be done before new CMs start, and Prospect Screening (WF045) should be done before WF007 (Offer to Purchase) goes live. The Wave 8 label means "build last," not "unimportant."

WF042	**Manager Onboarding**	SOP 700 • New CM/RM onboarding checklist in QB • Tracks: system access setup (RM, QB, FastField, Teams, SharePoint), keys/codes, property walkthrough, training completion • Connects to WF031 (Fair Housing training record creation) • 30-day, 60-day, 90-day milestone check-ins • HR owns; Regional Manager executes	NEW QB-Only
WF043	**Team Onboarding & Training Tracking**	SOP 702 • Broader training log: all staff, all training programs • QB record per training event per employee • Connects to WF031 (Fair Housing) and WF042 (Manager Onboarding) • Compliance training	

		completion tracked for legal audit purposes	NEW QB-Only
WF044	Property Business Plan	SOP 109 • Monthly/quarterly community business plan: occupancy targets, revenue goals, capex priorities, delinquency thresholds • CM and Regional Manager complete in QB • QB pulls live data from Lease Records, Work Orders, and Listing Records to pre-populate metrics • Regional approval before submission to leadership	NEW QB-Only
WF045	Prospect Screening & Background Check	SOPs 005/006 (AMRENT) • Screening workflow initiated with WF007 Offer to Purchase • QB tracks AMRENT order status, results, approval/denial decision • Approval criteria consistent across all states • Denial requires documented	

		reason (Fair Housing compliance) • Approved: moves to WF007 next step; Denied: WF007 rejected path	NEW QB-Only	
WF046	Online Loan Application Process	SOP 7 • Parakeet in-house financing or lender referral process • QB tracks loan application status: submitted, under review, approved, denied • Reads Offer record from WF007 for loan amount and home details • Connects to WF022 Home Closing on approval • Denial returns to WF007 for cash or alternative financing path	NEW QB-Only	

6. Full SOP-to-Workflow Mapping (91 SOPs)

● Tier 1 – Critical ● Tier 2 – High ● Tier 3 – Standard ● Recommended Addition

FF FastField form required QB QB-only workflow LOCKED Spec locked DRAFT Spec in draft

22	PPE	Operations	—	—	—	POLICY	—	Safety compliance doc; no QB workflow needed
23	Equipment and Inventory Checklist	Operations	Tier 3	WF009/ WF010	Wave 4	FF	PLANNED	Weekly (WF009) + Monthly (WF010) FastField forms
24	Emergency Infrastructure Escalation	Operations	Rec. Addition	WF013	Wave 5	FF	MERGED → WF013	High-severity path within WF013 Incident Report
25	Emergency Property Level Issue Reporting	Operations	Tier 1	WF013	Wave 5	FF	MERGED → WF013	Merged with WF013 Incident Report (same FastField form, different routing)

CONSTRUCTION / OPERATIONS								
200	Demo to Infill Process	Construction	Tier 1	WF025	Wave 4	QB	PLANNED	Triggered by WF003 (Demo); feeds WF026, WF001
201	New Home Delivery	Construction	–	WF001	Wave 0	MERGED → WF001	LOCKED v1.2	Fully covered in WF001 spec
202	Site Approval Checklist	Construction	–	WF001	Wave 0	MERGED → WF001	LOCKED v1.2	Fully covered in WF001 spec
203	New Home Delivery / Set / Utility / Sales Release	Construction	Rec. Addition	WF001	Wave 0	MERGED → WF001	LOCKED v1.2	Fully covered in WF001 spec
204	In-House Construction Projects	Construction	Tier 2	–	Wave 4	POLICY	PLANNED	Project scoping/planning doc; tracked via Work Orders
205	Lot Prep	Construction	Tier 1	WF026	Wave 4	FF	PLANNED	Feeds WF001 (lot readiness gate); Utility Accounts table
206	Make Ready Board Flow	Construction	Tier 1	WF003	Wave 0	MERGED → WF003	LOCKED v1.1	MRB is retired (E-001). Disposition Review (WF003) replaces MRB entirely.

207	Construction Roles & Responsibilities	Construction	Tier 3	—	—	POLICY	PLANNED	Org chart / RACI doc; no QB workflow needed
208	Construction-to-Operations Handoff	Construction	Rec. Addition	WF001	Wave 0	MERGED → WF001	LOCKED v1.2	WF001 two-stage inspection = construction handoff to Ops
209	Construction Onboarding	Construction	Tier 3	—	Wave 8	POLICY	PLANNED	HR/onboarding doc; consider adding to WF043
210	Construction Preventative Checklist	Construction	Tier 2	WF009	Wave 4	FF	MERGED → WF009	Weekly maintenance checklist covers preventative items
211	New Home Walkthrough Checklist	Construction	Tier 2	WF001	Wave 0	MERGED → WF001	LOCKED v1.2	89-item Construction Inspection form in WF001 spec
212	Project Coordination (Ops/Const Weekly)	Construction	Tier 3	—	—	POLICY	PLANNED	Meeting cadence doc; no QB workflow needed
213	Project Planning and Scope	Construction	Tier 2	—	Wave 4	POLICY	PLANNED	Project scoping process; tracked in WF002 or Work Orders
214	Project Sign Off	Construction	Tier 2	WF002	Wave 0	MERGED → WF002	LOCKED v1.3	WF002 Stage 9 = Completion / Sign-Off gate
21-								

5	Property Future Cap Ex	Construction	Tier 2	–	Wave 6	POLICY	PLANNED	CapEx planning doc; feeds WF037 Financial Reporting
216	Vendor Start / Stop / Access Process	Construction	Rec. Addition	–	Wave 4	POLICY	PLANNED	Vendor management policy; tracked in QB Vendors table
SALES / MARKETING								
001	New Home Purchase Process (Dealer)	Sales	Tier 2	WF001	Wave 0	MERGED → WF001	LOCKED v1.2	WF001 covers dealer home ordering
002	Home Sales Process	Sales	Tier 1	WF007	Wave 3	QB	PLANNED	Triggered by WF006 offer received; Title Records, Residents
003	Home Closing Process	Sales	Tier 1	WF022	Wave 3	QB	PLANNED	Triggered by WF007 approved offer; Title Records; SharePoint docs
004	Day of Closing Process	Sales	–	WF022	Wave 3	MERGED → WF022	–	Merged into Home Closing Process (WF022)
005	POH Sales Title Transfer	Sales	Tier 1	WF023	Wave 3	QB	PLANNED	Title Records table; state DMV/HCD filings
005	Prospect Screening / AMRENT	Sales	Tier 2	WF045	Wave 8	QB	PLANNED	Sub-process of WF007 Offer to Purchase
006	AMRENT Background Check &							

	Income Verification	Legal/Sales	Tier 2	WF045	Wave 8	QB	MERGED → WF045	Merged with Prospect Screening
7	Online Loan Application Process	Sales	Tier 2	WF046	Wave 8	QB	PLANNED	Sub-process of WF007; feeds WF022 Closing
8	Open House Process	Sales	Tier 3	—	—	POLICY	PLANNED	Marketing process doc; connects to WF006 listing record
9	Marketing Photography	Sales	Tier 3	—	—	POLICY	PLANNED	Marketing SOP; photos upload to SharePoint per WF006 listing
10	Sales Application-to-Lease Execution	Sales	Rec. Addition	WF007	Wave 3	QB	MERGED → WF007	Application → approval → lease = WF007 → WF005 path
11	Sales Rep Property Walk	Sales	Tier 3	—	—	POLICY	PLANNED	Sales training/process doc; no QB workflow needed
LEGAL / COMPLIANCE								
800	Eviction Process	Legal	Tier 1	WF019	Wave 2	QB	PLANNED	Residents, Lease Records, Title Records; 5 phases, 27 steps
800	Evictions (sub-SOP)	Legal	Tier 1	WF019	Wave 2	QB	MERGED → WF019	Merged with main Eviction workflow

801	Asset Title Transfer	Legal	Tier 2	WF024	Wave 3	QB	PLANNED	Title Records table; Vector Law / FL Fast Title
802	Fair Housing Annual Training	Legal	Tier 2	WF031	Wave 5	QB	PLANNED	All staff; connects to WF042 Onboarding
803	Insurance Renewals	Legal	Tier 2	WF032	Wave 5	QB	PLANNED	Calendar-triggered; COI uploaded to SharePoint
804	License / Permit Renewals	Legal	Tier 2	WF030	Wave 5	QB	PLANNED	Calendar-triggered; per community per license type
805	Post-Eviction Title Process	Legal	Tier 1	WF020	Wave 2	QB	PLANNED	Triggered by WF019; Title Records; Vector Law or FL Fast Title
806	Rent Increase & Tax Pass-Throughs	Legal	Tier 1	WF021	Wave 2	QB	PLANNED	State-specific notice periods; FL Ch. 723 rules; Lease Records
807	Resident Notice / Legal Document Distribution	Legal	Rec. Addition	—	Wave 2	POLICY	PLANNED	Document distribution standards; process doc; feeds WF017–WF021
808	Title Work Process	Legal	Tier 1	WF024	Wave 3	QB	MERGED → WF024	Merged with Asset Title Transfer workflow
809	Violation Process	Leg-						

		al	Tier 2	WF029	Wave 5	QB	PLANNED	Residents, Lease Records; connects to WF019 Eviction if uncured
HR / TRAINING								
700	Manager Onboarding	HR	Tier 2	WF042	Wave 8	QB	PLANNED	Connects to WF031 (Fair Housing training)
701	Online Onboarding	HR	Tier 3	WF042	Wave 8	MERGED → WF042	PLANNED	Merged with Manager Onboarding
702	Team Onboarding & Training	HR	Tier 2	WF043	Wave 8	QB	PLANNED	All staff; connects to WF031 training compliance
703	TripLog Training	HR	Tier 3	—	—	POLICY	PLANNED	Tool training SOP; no QB workflow needed
704	Disciplinary Action Forms	HR	—	—	—	POLICY	—	HR policy doc; no QB workflow needed
705	Hiring / Onboarding Process	HR	—	—	—	POLICY	—	HR/recruiting process; no QB workflow needed
SYSTEMS / REPORTING								
900	JotForm Process	Systems	Tier 2	—	—	POLICY	RETIRING	All 13 JotForms being retired and replaced by FastField + QB per D-008
901	Rent Manager Express Docs	Systems	Tier 2	—	Wave 1	POLICY	PLANNED	RM Express doc library governance doc; needed before WF016 (Lease Renewal)

7. Interconnection & Dependency Map

This section shows the full trigger chains across all workflows — where one workflow's outcome automatically starts another. Understanding these chains is critical for testing order (you can't test WF019 Eviction without WF017 Collections having an open record) and for designing QB automations correctly.

💲 REVENUE PROTECTION CHAIN (THE MOST CRITICAL PATH IN THE OS)

WF005 Move In → creates Resident + Lease record →

WF017 Collections (late payment) → WF018 Stipulation (payment plan)

→ default → WF019 Eviction Pipeline → POH writ granted →

WF020 Post-Eviction Title → title cleared → WF003 Disposition Review

→ Rehab → WF002 Rehab → WF006 Listings → WF007 Offer →

WF022 Closing

🏠 ASSET DELIVERY CHAIN (NEW HOME LIFECYCLE)

WF001 Home Ordering → delivery confirmed → WF026 Lot Prep

→ lot cleared → WF027 Utility Activation → utilities live → WF006 Listings

→ WF007 Offer → WF045 Screening → approved → WF005 Move In

🚪 MOVE OUT → WHAT HAPPENS NEXT

WF016 Lease Renewal (resident states intent to vacate) → triggers →

WF004 Move Out → inspected → WF034 Security Deposit Refund

WF004 Move Out → unit vacated → WF003 Disposition Review → Rehab → WF002 Rehab or → Demo → WF025 Demo to Infill → WF026 Lot Prep → WF001 New Home Order

---

🏠 ACQUISITIONS → SYSTEM ONBOARDING

WF038 Due Diligence → approved → WF039 Acquisitions Transition → creates all QB records → WF040 Utility Onboarding

WF039 Acquisitions Transition → residents imported → WF005 Move In (for incoming residents) → existing leases → WF016 Lease Renewal → WF041 Transition Recaps → WF008 First Site Visit (within 30 days)

📈 REPORTING ROLLUP CHAIN

WF009 Weekly Maintenance → feeds → WF010 Monthly Equipment → feeds → WF011 Month End Close → feeds → WF037 Financial Reporting → feeds → WF044 Business Plan

---

⚡ UTILITY LIFECYCLE CHAIN

WF040 Utility Onboarding (Acquisitions) → accounts established → WF027 Utility Activation → resident moves in → WF014 Utility Transfer (to resident) → move-out →

WF014 Utility Transfer (back to Parakeet) → feeds → WF035 Utility Recapture

8. Open Items & Decisions Needed Before Each Wave

The following decisions must be made before speccing can begin on each wave. Items marked "BLOCKING" mean the wave cannot be designed until that decision is made. Items marked "ADVISORY" mean speccing can begin but the item must be resolved before the spec is locked.

Pre-Work & Wave 0 Lock Items (BLOCKING)

O-PRE-001 — BLOCKING

Who owns the QB Residents table build — Austin or Justin (Asset Mgmt)?

Residents table is the single most critical pre-work item. It feeds 21 workflows. Someone must own the RM-to-QB mapping for resident records before Wave 1 can spec.

O-WF004-001 — BLOCKING (WF004 LOCK)

RM batch CSV column mapping for Move Out sync — what are the exact RM field names?

Justin / RM Admin must provide the exact RM field names that map to QB Move Out record fields. Required to lock WF004 spec.

O-WF004-002 — BLOCKING (WF004 LOCK)

What are the Move Out Inspection checklist items?

Austin / Ops must provide the actual inspection checklist. The WF004 FastField form cannot be built without the item list. A starting draft can come from the Home Readiness Checklist (Ops) document.

O-WF006-001 — ADVISORY (WF006 LOCK)

What listing platforms does Parakeet use (MHVillage, Zillow, Facebook, other)?

Leslie to confirm. Determines whether WF006 includes platform-specific fields or just a general “listed on” field.

O-WF006-002 — BLOCKING (WF006 LOCK)

Exact RM UDF field names for Listing Status, Listed By, Listing Date, Listing Price?

Justin / RM Admin must provide UDF names so the daily 6 PM batch CSV can map correctly to RM fields.

O-PRE-002 — BLOCKING

FastField multi-step approval routing: is it configured at the form level or the account level?

WF004 (Move Out), WF005 (Move In), WF013 (Incident Report), and WF028 (Rental Inspection) all require multi-step FastField approval routing (CM → Regional Manager → Regional Director). Must confirm FastField account supports this before designing any of these forms.

Wave 1 Design Inputs Needed

O-WF005-001 — BLOCKING

Move-In Condition Report: what does the form need to capture?

Ops / Austin must define the Move-In Condition Report items (room-by-room? exterior-only? appliances?). Starting point: Home Readiness Checklist Ops document. This drives the WF005 FastField form design.

O-WF005-002 — ADVISORY

Does MA require digital or wet signature on move-in leases?

MA has the strictest tenant laws. The 72-hr disclosure package requirement (WF016) must also be determined to apply at move-in for new leases. Justin / Legal must confirm.

O-WF016-001 — ADVISORY

What is the lease renewal SLA from notice issuance to signature required?

Needed to set the QB automation reminder schedule for WF016. Austin / Ops to confirm. Suggested: 14-day reminder, 7-day escalation to Regional Manager, 3-day escalation to DOO.

O-WF014-001 — BLOCKING

Utility Transfer process: does Parakeet call the utility company directly, or does the resident?

WF014 Utility Request and WF005 Move In both need this confirmed. In some communities, Parakeet manages utility transfers; in others, the resident calls. May be community-specific. Justin / Ops to confirm.

Wave 2 Design Inputs Needed

O-WF017-001 — BLOCKING

Who generates and physically sends the demand notices — Melanie (Ops Coordinator) only, or Regional Manager for some states?

From SOP 100: Melanie handles UPS certified mail. But does the Regional Manager sign the notice, or is it generic? The QB automation needs to know who to notify and whether a signature field is required.

O-WF019-001 — ADVISORY

Does the Eviction Pipeline differ meaningfully by state beyond the cure period (e.g., hearing timing, writ timeline, auction requirements)?

WF019 is the most state-sensitive workflow in the OS. The SOP covers FL in detail. GA, MA, NC, SC process steps may differ significantly. Vector Law or outside counsel should document state-specific variations before WF019 is specced.

O-WF021-001 — BLOCKING

For FL Ch. 723 rent increases: when was each community's prospectus last updated, and does an increase require a prospectus amendment?

FL communities under Ch. 723 may require prospectus amendments for rent increases above a certain threshold. WF021 must know which communities are Ch. 723 vs. standard lot rental to apply the correct rules. Asset Mgmt (Justin) to provide list.

O-WF018-001 — ADVISORY

Stipulation agreement template: is there a standard Parakeet template, or does it vary by state?

The WF018 spec will need to reference the actual Stipulation Agreement template. If state-specific, that affects the QB form fields. Regional Manager approval is confirmed (from SOP 100).

Wave 3–8 Advisory Items

O-WF022-001 — ADVISORY

Does the Home Closing workflow need title company integration, or is it fully internally managed?

WF022 Home Closing may involve a title company, attorney, or be fully self-managed by Asset Mgmt. The workflow design differs significantly based on this. Justin / Legal to confirm for each sale type.

O-WF027-001 — ADVISORY

Which communities are sub-metered vs. master-metered vs. RUBS, and does that list already exist in RM?

WF027 Utility Activation and WF035 Utility Recapture both need utility type per community. If this is already in RM, it can be imported into the Utility Accounts table. Justin / Accounting to confirm.

O-WF038-001 — ADVISORY

Is there a standard Due Diligence checklist Parakeet uses today, and what is the approval path for acquisition go/no-go?

WF038 Due Diligence needs the actual DD checklist items and the approval structure (Austin only? Board vote?). Asset Mgmt to provide the current DD process documentation.

O-GEN-001 — ADVISORY

SharePoint folder structure: where does each workflow type store its documents?

Multiple workflows (WF004, WF005, WF022, WF028, WF038) push documents to SharePoint. A consistent, pre-defined SharePoint folder structure must be established before any of these workflows are built. IT / Austin to define the structure once and apply it across all workflows.

9. Appendix — Full Workflow Registry (WF001–WF046)

WF #	WORKFLOW NAME	SOP(S)	WAVE	FORM	QB TABLES (PRIMARY)	KEY AUTOMATIONS	SPEC STATUS
WF001	Home Ordering, Delivery & Set	001, 201, 202, 211	Wave 0	FF ×4	Home Orders, Delivery, Const Inspection, Ops Readiness, Communities, Lots, Vendors	14 automations; 9 gate rules; A-HO-01 to A-HO-14	LOCKED v1.2
