INTERNAL BUILD SPECIFICATION

WORKFLOW #002 · REHAB

Rehab

Quickbase + FastField Build Specification
Existing Home Rehabilitation — Vacant to Ready to Market

Parakeet Communities · Internal · Confidential

VERSION	DATE	STATUS	WORKFLOW ID	SUPERSEDES	COMMUNITIES
v1.3	08/19/26	APPROVED	WF002	v1.2 — 08/18/26	68 Active

v1.3 Changes: All remaining open items resolved — spec now Approved. Bid approval thresholds confirmed (D-034): <$2,500.00 = no approval; $2,500.00–$5,000.00 = Regional Manager; >$5,000.00 = Austin. SLA thresholds confirmed (D-035): 3 bd walkthrough, 5 bd task, 30 cal days full project. Escalation path (D-033): 7 days past SLA → Ops Director; 30 cal days without Completion → Austin. Photo storage confirmed (D-036): QB attachment + SharePoint push (Option D). Listing handoff recipients (D-037): Leslie & Tanya. O-WF002-NEW-03, -04, -07, -08, Q-030, Q-037, Q-039 closed.

SECTION 01 Document Purpose

WF002 – Rehab

This specification defines the complete Quickbase (QB) tables, workflow stages, automations, gate rules, and FastField form required to build **Workflow #002: Rehab**. WF002 manages the end-to-end process of taking an existing home from a Rehab disposition decision – made via the TBD Report or manually – through completed rehabilitation, final walkthrough approval, and handoff notification to the listing team.

WF002 is independent of WF001 (Home Ordering). WF001 covers new homes ordered from manufacturers. WF002 covers *existing homes* in the portfolio that require rehabilitation before they can be re-listed or re-occupied.

> **System of Record:** Rent Manager (RM) remains the authoritative source for asset data, financial records, insurance, and lease history. This build complements RM – it does not replace or auto-modify any RM records. All RM field references in QB are cross-references only. No data is written back to Rent Manager from QB.

BOUNDARY	DETAIL
In Scope	All 9 rehab workflow stages; QB tables (Lot Status ref, Asset Status ref, Rehab Records, Rehab Tasks, Walkthrough Records, Vendors); FastField Rehab Walkthrough Punchlist form with photo capture; FastField → QB webhook integration; all automations and gate rules defined in this document; 68-community Communities table (from dw_PDS.xlsx)
Out of Scope	Rent Manager record creation or modification; marketing execution after listing; Workflow #001 (new home ordering); invoice processing or payment; vendor portal access; WF003 Asset Disposition Review meeting design (separate workflow – see Q-037)
Dependent Workflows	WF003 Asset Disposition Review (proposed) – weekly Monday meeting assigns Rehab / Demo / Turn for Sale dispositions; triggers WF002 when disposition = Rehab. Move Out workflow – completed move-out can trigger WF002. Listing workflow – WF002 notifies listing team at Stage 8; listing team initiates listing manually.

SECTION 02 Workflow Overview

WF002 – Rehab

WORKFLOW ID	WORKFLOW NAME	VERSION
WF002	Rehab	v1.3 APPROVED

APPLIES TO

Existing homes — vacant or flagged for rehab	**PRIMARY ACTOR** Community Manager + Ops Team	**SYSTEM OF RECORD** Rent Manager (read-only reference)
TRIGGER Asset Disposition Review Meeting (Rehab outcome) / Manual / Move Out	**OUTCOME** Approved → Notification to listing team	**STAGES** 9 (incl. 1 conditional loop at Stage 7)

Trigger Logic

Table 2-1 WF002 Trigger Sources

TRIGGER SOURCE	MECHANISM	WHO INITIATES
Asset Disposition Review Meeting	Weekly Monday meeting run by Asset Management. Participants: Asset Management, Ops, Construction, and Sales. Agenda: review all recently vacated units/lots and assign a disposition — **Rehab**, **Demo**, or **Turn for Sale**. When disposition = Rehab is recorded in QB, automation A-RH-01 creates a new Rehab Record automatically. *Note: Meeting currently runs outside QB. WF003 (Asset Disposition Review) proposed to bring it into QB — see Open Item O-WF002-NEW-01 and Q-037.*	Asset Management team (meeting recorder)
Manual	Ops team or Community Manager manually creates a Rehab Record in QB. Used for acquired homes, homes with damage identified during inspection, or portfolio-wide rehab reviews.	Ops team / Community Manager
Move Out	Completed Move Out record can trigger WF002 when the disposition assigned at move-out = Rehab.	Automated on Move Out completion

Listing Handoff (Important)

Listing handoff = notification only. When a home is Approved as Ready to Market (Stage 8), Automation A-RH-07 sends a notification to the listing team: *"Home at [Community] Lot [Lot] has been approved. Please complete a Listing Request Form."* The notification includes a link to the Listing Request form. The listing team initiates listing manually — WF002 does **not** auto-create a listing record.

Relationship to Other Workflows

Table 2-2 Related Workflows

WORKFLOW	RELATIONSHIP
WF001 — Home Ordering	Entirely separate workflow. WF001 covers new homes from manufacturers. WF002 covers existing portfolio homes. No shared stages; WF002 connects only at the listing handoff notification.
WF003 — Asset Disposition Review	Upstream trigger workflow (proposed). The weekly Monday Asset Management meeting reviews recently vacated units/lots and assigns dispositions: Rehab / Demo / Turn for Sale. When disposition = Rehab is recorded in QB, A-RH-01 auto-creates a WF002 Rehab Record. WF003 is not yet designed — currently the meeting runs outside QB and dispositions are entered manually. See Q-037.
Move Out	A completed Move Out where disposition = Rehab triggers WF002 automatically. Move Out workflow must pass Lot ID, Asset ID, and Community to the new Rehab Record.
Listing Workflow	WF002 Stage 8 notifies the listing team. Listing team creates the Listing Request manually. WF002 Stage 9 (Closed) is confirmed when listing initiation is acknowledged.

SECTION 03 Workflow Stages

9 Stages · 1 Conditional Loop

Nine stages define the full lifecycle from rehab identification through listing handoff. **Stage 7 is a conditional loop** – entered only when the walkthrough result is not a full approval. A passing walkthrough at Stage 6 advances directly to Stage 8, skipping Stage 7 entirely.

> *Stage 7 (amber):* *Conditional – entered only when Walkthrough Status ≠ Approved as Ready to Market. Loops back to Stage 4. Skipped entirely on first-pass approval (Stage 6 → Stage 8 direct).*

Table 3-1 Stage Detail Reference

#	STAGE NAME	OWNER	DESCRIPTION
1	Rehab Identified	Ops / Community Mgr	Home assigned Rehab disposition via TBD Report or manually. QB Rehab Record created. Lot Status and Asset Status both set using reference tables (LS and AS). Rehab ID auto-generated. Lot Status → Rehab; Asset Status → In Rehab.
2	Scope Assessed	Community Mgr	Physical walk of home complete. Scope of work documented in Scope Notes. Estimated Total Cost entered. Budget by category optionally filled. Gate: Scope Notes not blank before advancing.
3	Work Assigned	Ops	Rehab Tasks records created in QB. Each task assigned to In-House staff or External Vendor. Vendors drawn from Vendors reference table (SharePoint-synced – see Section 6). Gate: Estimated Total Cost > $0.00; at least one Rehab Task record exists.
4	Work In Progress	In-House / Vendor	Active rehab underway. Rehab Tasks updated as items completed. Actual costs logged per task. Gate: at least one Rehab Task status = In Progress or Complete.
5	Walkthrough Scheduled	Community Mgr	Final walkthrough date set. Automation A-RH-05 generates pre-populated FastField launch link. Gate: Walkthrough Scheduled Date populated.
6	Walkthrough Complete	Community Mgr / Inspector	FastField Rehab Walkthrough Punchlist submitted with optional photos. Webhook creates child Walkthrough Record. Pass rate calculated. Walkthrough Status set. Gate: at least one Walkthrough Record linked to this Rehab Record.
7	Items To Resolve	Community Mgr	*Conditional – entered only when Walkthrough Status ≠ Approved as Ready to Market.* Follow-up Rehab Task records created. Loops back to Stage 4 when all tasks are resolved and walkthrough re-scheduled.
8	Approved – Ready to Market	Ops	Walkthrough Status = Approved as Ready to Market. Asset Status → For Sale. Lot Status → Lot-Avail(POH) (confirm exact value per asset type at build). Notification sent to Leslie and Tanya with link to Listing Request form. Gate: Walkthrough Status = Approved as Ready to Market (hard block on any other value).
9	Closed	Ops	Listing team confirms initiation. Rehab Record closed. Closed Date set. Final Actual Cost calculated from all linked Rehab Tasks. Record becomes read-only.

SECTION 04 Quickbase Tables

5 Tables: 2 Reference + 1 Main + 2 Child

Table Architecture: WF002 introduces two standalone reference tables (Lot Status, Asset Status) that function as system-wide lookup tables — not just WF002-specific. Every Lot record and every Asset record in the QB app links to these tables. They are designed once and reused across all workflows.

4A — Reference Table 1: Lot Status (LS)

Standalone lookup table. All valid Lot Status values system-wide. Lot records link to this table — Lot Status is a relationship field, not a static dropdown. Status ID format: LS-###

REFERENCE TABLE — LOT STATUS (LS) — FIELD DEFINITIONS

FIELD NAME	FIELD TYPE	NOTES / RULES
Status ID	*Text (auto)*	LS-### format. Auto-generated on record creation.
Status Name	Text	The status label shown in all QB dropdowns and views.
Status Category	Dropdown	Values: Active / Inactive / Transitional. Used for reporting and filter grouping.
Description	Text (multi-line)	Operational definition — what this status means in practice.
Allows New Home Order	Checkbox	Yes/No. Drives WF001 (Home Ordering) filter — only lots where this = Yes appear in new order dropdowns.
Allows Move In	Checkbox	Yes/No.
Allows Move Out	Checkbox	Yes/No.
Allows Rehab	Checkbox	Yes/No. Drives WF002 filter — only lots where this = Yes are eligible for Rehab Records.
Allows Listing	Checkbox	Yes/No.

LOT STATUS VALUES — 16 VALUES (SOURCE: UNIT TYPE LISTING.XLSX — RM-ALIGNED)

STATUS NAME	CATEGORY	DESCRIPTION
Lot	Active	Basic available lot; no home present or home available for placement. Allows: New Home Order, Move In, Rehab, Listing.
Lot-Avail(POH)	Active	Lot with an available Park Owned Home; ready for move-in or listing.
Lot-Rental	Active	Lot with an occupied rental home. Resident currently in place. Allows: Move Out.
Lot-LTP	Active	Lot with a home under a Lease-To-Purchase agreement.
Lot-RV	Active	RV lot — standard occupancy.
Lot-RV(Transient)	Active	RV lot for transient/short-term occupancy.
Lot-RV(Seasonal)	Active	RV lot for seasonal occupancy.
Lot-In Rehab	Transitional	Lot with Park Owned Home currently in active rehabilitation. WF002 in progress. Set automatically by A-RH-01 at WF002 Stage 1.
Lot-Need Rehab	Transitional	Lot with a home identified as needing rehab. Disposition decided at Asset Disposition Review meeting; WF002 not yet triggered.
Lot-Pending(POH)	Transitional	Lot with a Park Owned Home pending delivery or setup. WF001 in progress.
Lot-Evicted	Transitional	Lot where eviction has been filed or completed; home is being vacated.

Lot-Evicted (Rental)	Transitional	Same as Lot-Evicted; applies to a rental home arrangement.
Lot-Demo	Inactive	Lot with a home flagged for demolition. No workflow actions permitted until demo is complete.
Lot-Abandoned	Inactive	Lot with an abandoned home; pending disposition decision. No actions permitted until disposition is confirmed.
Lot-Not Ready	Inactive	Lot not ready for use – infrastructure, compliance, or construction issue pending.
Lot-Unusable	Inactive	Lot flagged as permanently unusable. No workflow actions permitted.

4B – Reference Table 2: Asset Status (AS)

Standalone lookup table. All valid Asset Status values system-wide. Asset records link to this table. Status ID format: AS-###

REFERENCE TABLE – ASSET STATUS (AS) – FIELD DEFINITIONS		
FIELD NAME	FIELD TYPE	NOTES / RULES
Status ID	*Text (auto)*	AS-### format.
Status Name	Text	The status label used in dropdowns and views.
Status Category	Dropdown	Values: Active / Inactive / Transitional.
Description	Text (multi-line)	Operational meaning.
Allows Rehab Walkthrough	Checkbox	Yes/No. Drives FastField form filter – only assets where this = Yes appear eligible for walkthrough submission.
Allows Listing	Checkbox	Yes/No.

ASSET STATUS VALUES – 25 VALUES (SOURCE: ASSET STATUS.XLSX – RM-ALIGNED)		
STATUS NAME	CATEGORY	DESCRIPTION
Rental	Active	Asset is an active rental home with a resident in place.
In Use	Active	Asset is occupied or in active operational use.
For Sale	Active	Asset is listed for sale on the market.
Lease Option (LOP)	Active	Asset is under a lease-option (lease-to-own) agreement.
Rent to Own Agreement	Active	Asset is under a rent-to-own agreement with a resident.
Promissory Note	Active	Asset sale is structured under a promissory note; payments in progress.
Needs Rehab	Transitional	Asset identified as needing rehabilitation. Disposition set at Asset Disposition Review meeting; WF002 not yet triggered.
Rehab in Process	Transitional	Active rehabilitation underway. WF002 in progress. Allows Rehab Walkthrough. Set automatically by A-RH-01.
TBD	Transitional	Status pending; unit is in transition and disposition has not yet been assigned (reviewed at Monday Asset Disposition meeting).
Delivered	Transitional	New home has been delivered to the lot; setup and inspections not yet complete. WF001 in progress.
Ordered	Transitional	New home has been ordered; delivery pending. WF001 in progress.
Setting Needed	Transitional	Home delivered but setup (blocking, skirting, connections) not yet complete.

Permit Pending	Transitional	Required permits have been applied for; next workflow step blocked until permits are issued.
Pending Sale	Transitional	Sale is in progress; awaiting closing. No new tenancy or listing actions permitted.
Eviction Filed	Transitional	Eviction process has been initiated; resident is still in the home.
Title Pending Transfer to Buyer	Transitional	Sale closing is in process; title transfer to buyer underway.
Title Pending Transfer to Parakeet	Transitional	Acquisition in process; title transfer to Parakeet Communities underway.
Waiting on Title	Transitional	Title issues pending resolution; no transactions permitted until title is clear.
Abandoned	Inactive	Home has been abandoned; pending disposition decision at Asset Disposition Review meeting.
To Be Demoed	Inactive	Home is flagged for demolition. No workflow actions permitted.
Sold	Inactive	Home has been sold; record is closed.
In Storage	Inactive	Home is in off-site storage; not currently placed on a lot.
Declaratory Judgement	Inactive	Legal action in process; no operational workflow actions permitted until resolved.
Title in Deceased Owners Name	Inactive	Title issue due to deceased owner; no transactions until legal resolution.
< UNASSIGNED >	Inactive	Default state on new record creation; no status has been assigned yet.

4C Main Table: Rehab Records (RH)

One record per home rehab project

Parent to Rehab Tasks and Walkthrough Records. Record ID format: RH-YYYY-### (e.g., RH-2026-001). Green italic = auto-populated. Red bold = required. Blue italic = calculated.

Identity & Location

FIELD NAME	FIELD TYPE	NOTES / RULES
Rehab ID	*Text (auto-generated)*	Format: RH-YYYY-###. Auto-generated by Automation A-RH-01 on record creation.
Community	Relationship → Communities	**Required.** Cascading – top of Community → Lot → Asset chain. Filtered to active communities (Active = Yes).
Lot	Relationship → Lots	**Required.** Filtered to selected Community. Lot Status = Available or Rehab.
Asset	Relationship → Assets	**Required.** Filtered to selected Lot.
RM Asset Record #	Text	Cross-reference to Rent Manager asset record. Manual entry only – not auto-synced.
RM Unit #	Text	Cross-reference to Rent Manager unit number. Manual entry only – not auto-synced.

Workflow State

FIELD NAME	FIELD TYPE	NOTES / RULES
Rehab Stage	Dropdown	Values: 1 Rehab Identified / 2 Scope Assessed / 3 Work Assigned / 4 Work In Progress / 5 Walkthrough Scheduled / 6 Walkthrough Complete / 7 Items To Resolve / 8 Approved – Ready to Market / 9 Closed. Locked by gate rules – cannot skip stages.

Triggered By	Dropdown	Values: TBD Report / Manual / Move Out / Acquisition. Determines the source of rehab identification.
Source Report Reference	Text	If Triggered By = TBD Report – report ID or report run date. Manual entry.
Source Move Out Record #	Relationship → Move Out Records	If Triggered By = Move Out – links to originating Move Out record.

Dates

FIELD NAME	FIELD TYPE	NOTES / RULES
Rehab Identified Date	Date	mm/dd/yy. Auto-populated by A-RH-01 on record creation.
Scope Assessed Date	Date	mm/dd/yy. Set by A-RH-02 when Stage advances to Scope Assessed.
Work Assigned Date	Date	mm/dd/yy. Set by A-RH-03 when Stage advances to Work Assigned.
Work Started Date	Date	mm/dd/yy. Set by A-RH-04 when Stage advances to Work In Progress.
Walkthrough Scheduled Date	Date	mm/dd/yy. Set by A-RH-05. Gate field – must be populated before Stage 5 → 6 transition.
Walkthrough Completed Date	Date	mm/dd/yy. Set by A-RH-06 on FastField webhook receipt.
Approved Date	Date	mm/dd/yy. Set by A-RH-07 when Walkthrough Status = Approved as Ready to Market.
Closed Date	Date	mm/dd/yy. Set by A-RH-10 on Stage 9 transition.
Days In Rehab	*Duration (calculated)*	Rehab Identified Date → Approved Date. Drives overdue alerts via A-RH-12: any SLA overdue by 7+ days → Ops Director alert; 30+ calendar days without Completion → Austin escalation.

Scope & Assignment

FIELD NAME	FIELD TYPE	NOTES / RULES
Scope Notes	Text (multi-line)	Description of the full rehab scope. Gate field – must not be blank before Stage 1 → Stage 2 transition.
Primary Assigned To	Text	Lead vendor or staff member name. Receives notification from A-RH-03.
Assignment Type	Dropdown	Values: In-House / External Vendor / Mixed.

Financial Tracking *(v1.1 Addition)*

FIELD NAME	FIELD TYPE	NOTES / RULES
Estimated Total Cost	Currency	$0.00 format. Gate field – must be > $0.00 before Stage 2 → Stage 3 transition (G-RH-02). Entered during scope assessment.
Budget – Interior	Currency	Optional category-level budget allocation. See Open Item O-WF002-NEW-04.
Budget – Doors & Hardware	Currency	Optional.
Budget – Kitchen	Currency	Optional.
Budget – Bathrooms	Currency	Optional.

Budget – Utilities	Currency	Optional.
Budget – Exterior & Landscaping	Currency	Optional.
Budget – Other	Currency	Optional.
Actual Cost	*Currency (calculated)*	Sum of Actual Cost across all linked Rehab Tasks. Auto-updates as tasks are completed and costs entered.
Budget Variance	*Currency (calculated)*	Estimated Total Cost − Actual Cost. Positive = under budget; Negative = over budget.
Over Budget	*Checkbox (calculated)*	True if Actual Cost > Estimated Total Cost. Used in QB views and overdue/alert reporting.

Walkthrough & Metadata

FIELD NAME	FIELD TYPE	NOTES / RULES
Walkthrough Status	Dropdown	Values: Approved as Ready to Market / Needs Additional Items / Not Ready / Vendor Needs to Finish. Set automatically by A-RH-06 on webhook receipt. Drives routing: A-RH-07 (approved) or A-RH-08 (not approved).
FastField Launch Link	URL	Pre-populated link to FastField Rehab Walkthrough Punchlist form. Auto-generated by A-RH-05 with Community, Lot, and Rehab Record ID as URL parameters.
Record Created By	*Text (auto)*	QB user who created the record.
Last Updated	*Date/Time (auto)*	QB auto-stamp on every save.

4D Child Table: Rehab Tasks (TK-RH)

One record per work item · Child of Rehab Records

Multiple tasks per Rehab Record. Record ID format: TK-RH-YYYY-##### (e.g., TK-RH-2026-00001). Financial fields added in v1.1.

FIELD NAME	FIELD TYPE	NOTES / RULES
IDENTITY		
Task ID	*Text (auto)*	TK-RH-YYYY-#####. Auto on record creation.
Parent Rehab Record	Relationship → Rehab Records	Required. Links task to parent rehab project.
Task Name	Text	Required. Free-text description of the specific work item.
Category	Dropdown	Values: Interior / Doors & Hardware / Kitchen / Bathrooms / Utilities / Exterior / Other. Used for budget-vs-actual reporting by category.
ASSIGNMENT		
Assignment Type	Dropdown	Values: In-House / External Vendor. Drives which assignment field is shown.
Assigned To (In-House)	Text	Staff name. Shown/required when Assignment Type = In-House.
Assigned Vendor	Relationship → Vendors	Shown/required when Assignment Type = External Vendor. Drawn from Vendors reference table (SharePoint-synced – Section 6). Filtered to Active vendors.

Vendor Contact	Text	Auto-populated from linked Vendor record (Primary Contact field). Read-only on task record.
Assigned Date	Date	mm/dd/yy. Date this task was assigned.
Due Date	Date	mm/dd/yy. Expected completion. Used in overdue reporting.
STATUS & COMPLETION		
Status	Dropdown	Values: Not Started / In Progress / Complete / Blocked. Gate field – all tasks must be Complete before re-walkthrough scheduling (G-RH-07).
Completion Date	Date	mm/dd/yy. Set when Status changes to Complete.
Notes	Text (multi-line)	Additional context, blockers, or completion notes.
FINANCIAL TRACKING (V1.1 ADDITION)		
Estimated Cost	Currency	Per-task estimate entered at assignment. $1,234.56 format.
Actual Cost	Currency	Actual spend entered on completion. $1,234.56 format. Rolled up to parent Rehab Record Actual Cost field.
Cost Variance	*Currency (calculated)*	Estimated Cost − Actual Cost. Positive = under budget; Negative = over budget.

4E Child Table: Rehab Walkthrough Records (RW)

One record per FastField submission · Populated via webhook

Multiple walkthrough records per Rehab Record (one per walkthrough attempt). Record ID format: RW-YYYY-### (e.g., RW-2026-001). Each checklist item has two QB fields: a Yes/No checkbox and an optional photo attachment field.

FIELD NAME	FIELD TYPE	NOTES / RULES
HEADER FIELDS		
Walkthrough Record ID	*Text (auto)*	RW-YYYY-###. Auto on webhook receipt.
Parent Rehab Record	Relationship → Rehab Records	Required. Matched by Rehab ID from FastField payload.
FastField Submission ID	Text	UUID from FastField webhook. Stored for audit traceability.
Community	Relationship → Communities	Pre-populated from form header. Cross-checks parent record.
Lot	Relationship → Lots	Pre-populated from form header. Cross-checks parent record.
Submitted By	Text	Manager name as entered on FastField form.
Manager Email	Email	From FastField form field.
Walkthrough Date	Date	mm/dd/yy. Date entered on form.
SECTION A – INTERIOR (10 ITEMS · 20 FIELDS: 10 YES/NO + 10 OPTIONAL PHOTO)		

Home Smells Clean	Checkbox (Yes / No)	
No Trash / Debris	Checkbox (Yes / No)	
Floors Swept / Mopped / Vacuumed	Checkbox (Yes / No)	
Cabinets / Counters / Appliances Cleaned	Checkbox (Yes / No)	
Blinds Installed / Clean / Working	Checkbox (Yes / No)	Each item also has a corresponding "[Item] – Photo" field (File attachment, optional). Photos are uploaded via FastField and transmitted in the webhook payload.
Outlet / Switch Covers Installed	Checkbox (Yes / No)	
Interior Bulbs Working	Checkbox (Yes / No)	
Smoke Detectors Working	Checkbox (Yes / No)	
Bath / Toilets / Sinks Cleaned	Checkbox (Yes / No)	
Windows Cleaned	Checkbox (Yes / No)	
SECTION B – DOORS, HARDWARE & SAFETY (5 ITEMS · 10 FIELDS)		
Front Door Handle / Lock Good or Replaced	Checkbox (Yes / No)	+ Photo field
Deadbolt Works / Keys Labeled	Checkbox (Yes / No)	+ Photo field
Interior / Closet Doors Work	Checkbox (Yes / No)	+ Photo field
Windows Open / Close / Lock	Checkbox (Yes / No)	+ Photo field
Steps / Porch / Handrails Safe	Checkbox (Yes / No)	+ Photo field
SECTION C – KITCHEN & APPLIANCES (6 ITEMS · 12 FIELDS)		
Refrigerator Clean / Working	Checkbox (Yes / No)	+ Photo field
Stove / Oven Clean / Working	Checkbox (Yes / No)	+ Photo field
Dishwasher / Range Hood Works	Checkbox (Yes / No)	+ Photo field
Sink / Faucet Works	Checkbox (Yes / No)	+ Photo field
No Leaks Under Sink	Checkbox (Yes / No)	+ Photo field
Cabinets / Drawers Work	Checkbox (Yes / No)	+ Photo field

SECTION D – BATHROOMS & PLUMBING (6 ITEMS · 12 FIELDS)		
New Toilet Seat Installed	Checkbox (Yes / No)	+ Photo field
Toilet Flushes	Checkbox (Yes / No)	+ Photo field
Sink / Shower / Tub Work	Checkbox (Yes / No)	+ Photo field
No Leaks	Checkbox (Yes / No)	+ Photo field
Mirror / Vanity / Towel Bar Secure	Checkbox (Yes / No)	+ Photo field
Caulking Clean / Complete	Checkbox (Yes / No)	+ Photo field
SECTION E – UTILITIES & VACANT HOME CHECK (5 ITEMS · 10 FIELDS)		
Electric On / Staying On	Checkbox (Yes / No)	+ Photo field
Water On / Staying On	Checkbox (Yes / No)	+ Photo field
Heat / A/C Works	Checkbox (Yes / No)	+ Photo field
Toilets Flushed / Water Run in Sinks	Checkbox (Yes / No)	+ Photo field
Checked for Leaks / Odors / Pests / Vandalism	Checkbox (Yes / No)	+ Photo field
SECTION F – EXTERIOR & LANDSCAPING (5 ITEMS · 9 FIELDS: 4 YES/NO + 4 PHOTOS + 1 DROPDOWN)		
Exterior Clean / Power Washed	Checkbox (Yes / No)	+ Photo field
Skirting Secure / Presentable	Checkbox (Yes / No)	+ Photo field
Yard Cleaned / Grass Cut / Weeds Handled	Checkbox (Yes / No)	+ Photo field
Landscaping Complete or Assigned	Checkbox (Yes / No)	+ Photo field
Landscaping Owner	Dropdown	Values: Maintenance / Manager / Vendor. Required when Landscaping = Yes. No photo field for this item.
CALCULATED SUMMARY FIELDS		
Items Passed	*Number (calculated)*	Count of Yes responses across all 37 checklist items.
Items Failed	*Number (calculated)*	Count of No responses across all 37 items.
Pass Rate	*Percentage (calculated)*	Items Passed ÷ 37 × 100. Display format: xx.x%. Example: 35 of 37 = 94.6%.
Photos Submitted	*Number (calculated)*	Count of photo attachment fields that are not null.

STATUS & SIGNATURE		
Walkthrough Status	Dropdown	Required. Values: Approved as Ready to Market / Needs Additional Items / Not Ready / Vendor Needs to Finish. Copied to parent Rehab Record by A-RH-06.
Inspector Signature	Signature	Captured in FastField. Stored as image attachment in QB record.

5. FastField Form – WF002 Rehab Walkthrough

The Rehab Walkthrough form is built in FastField and completed by the inspector in the field at each unit. The form captures 37 condition checklist items (each with an optional photo), calculated results, and a final status determination with inspector signature. All data syncs back to QuickBase upon form submission.

5.1 Form Metadata (Header Section)

FIELD	TYPE	NOTES
WF002 Form ID	Text (auto)	Auto-populated from QuickBase Rehab Record; links submission back to QB record
Community	Text (auto)	Pulled from QB; read-only in field
Lot Number	Text (auto)	Pulled from QB; read-only in field
Inspector Name	Text	FastField user display name; auto-populated from login
Inspection Date	Date	Defaults to device date; editable by inspector
Unit Make / Model / Year	Text	Free entry; used to confirm the correct unit

5.2 Checklist Sections & Items

Each checklist item is a **Pass / Fail / N/A** dropdown followed by an optional **Photo** capture field and a free-text **Notes** field. Items marked *Fail* automatically populate the Rehab Tasks table in QB (via automation A-RH-05). The 37 items are organized into six sections:

#	ITEM	SECTION	SCOPE HINT / COMMON FAILURES
EXTERIOR			
1	Roof Condition	Exterior	Shingles, flashing, vents, gutters; check for missing/curled shingles
2	Skirting & Foundation	Exterior	Vinyl or metal skirting; loose panels, rust, ground contact damage
3	Steps / Landing	Exterior	Entry steps stability, handrail presence, surface condition
4	Exterior Walls	Exterior	Siding dents, cracks, paint, holes; sealant around penetrations
5	Windows (Exterior)	Exterior	Screens present, frames intact, seals, caulking
6	Doors (Exterior)	Exterior	Entry door, storm door; latch/lock, weatherstripping, frame
7	Tie-Downs / Anchors	Exterior	Per-lot count, strap condition, pier blocks visible
8	Utility Connections (Exterior)	Exterior	Meter bases, gas risers, water shut-off, sewer cleanout caps
INTERIOR – GENERAL			
9	Floors – Living Areas	Interior – General	Soft spots, delamination, tears, staining; subfloor integrity
10	Walls & Ceilings	Interior – General	Water stains, holes, cracks, texture, paint condition

11	Windows (Interior)	Interior – General	Latches, blinds/coverings, cracked panes, condensation between panes
12	Doors (Interior)	Interior – General	All interior doors; hinges, knobs, latches, alignment
13	Light Fixtures & Switches	Interior – General	Covers present, bulbs functional, switches operate correctly
14	Smoke / CO Detectors	Interior – General	Present per code; battery functional; test button response
15	Electrical Panel	Interior – General	Breakers labeled, no open knockouts, no double-tapping visible
16	HVAC – Heating	Interior – General	Furnace/heat pump; filter date, airflow, ignition; thermostat operation
17	HVAC – Cooling	Interior – General	AC unit/condenser; cooling operation, refrigerant lines, condensate drain
18	Water Heater	Interior – General	Age (check tag), T&P valve, connections, anode rod access
KITCHEN			
19	Cabinets & Countertops	Kitchen	Door/drawer fronts, hinges, laminate condition, delamination
20	Sink & Faucet	Kitchen	Flow, drainage, shut-offs accessible, P-trap condition, caulk
21	Appliances	Kitchen	Range, oven, refrigerator, dishwasher (if present); functional test
22	Range Hood / Ventilation	Kitchen	Fan operation, filter/grease screen, exterior vent damper
23	GFI Outlets – Kitchen	Kitchen	Test/reset, proper cover plates, within 6 ft of sink
BATHROOMS			
24	Bath – Tub / Shower	Bathrooms	Caulk, grout, surround panels; drain; faucet/shower valve
25	Bath – Toilet	Bathrooms	Flush, fill valve, flapper, supply line, wax seal (no rocking)
26	Bath – Vanity & Sink	Bathrooms	Cabinet condition, faucet, drain, P-trap, GFCI outlet
27	Bath – Ventilation	Bathrooms	Exhaust fan operation, duct to exterior (not into attic/crawl)
28	Bath – Flooring	Bathrooms	Vinyl/tile condition, soft spots near toilet/tub, transition strips
PLUMBING & MECHANICAL			
29	Under-Floor Plumbing	Plumbing & Mech.	Accessible via belly board; sagging insulation, leaks, rodent damage
30	Main Water Line / Shut-off	Plumbing & Mech.	Valve operable, no corrosion; pressure adequate at fixtures
31	Drainage / Sewer Connection	Plumbing & Mech.	Trap arm lengths, venting present, no belly; connection at pedestal
32	Gas System (if applicable)	Plumbing & Mech.	Visible lines, shutoffs, connectors; no odor; appliance connections
SAFETY & CLEANUP			
33	Hazardous Materials Observation	Safety & Cleanup	Visible mold, asbestos-suspect materials, lead paint (pre-1978); note only

34	Pest / Rodent Evidence	Safety & Cleanup	Droppings, gnaw marks, entry points; nesting material
35	Personal Property / Debris	Safety & Cleanup	Left-behind belongings, furniture, bulk waste; note quantity
36	Lot Cleanup Required	Safety & Cleanup	Vegetation overgrowth, tires, appliances, hazardous items on lot
37	Overall Cleanliness	Safety & Cleanup	General condition; move-in readiness level (1–5 estimate)

5.3 Calculated & Summary Fields

FIELD	TYPE	LOGIC
Total Items Inspected	Calculated	COUNT of items where result ≠ N/A
Total Fails	Calculated	COUNT of items where result = Fail
Fail Rate %	Calculated	Total Fails ÷ Total Items Inspected × 100; displayed to one decimal
Recommended Disposition	Calculated	If Fail Rate > 60% → "Full Rehab Required"; 30–60% → "Partial Rehab"; <30% → "Minor Work Only"
Photo Count	Calculated	COUNT of photo fields with an attachment; surfaced in QB for audit completeness

5.4 Submission & Signature

FIELD	TYPE	NOTES
Overall Walkthrough Status	Dropdown	Inspector selects: *Pass – Ready for Bid* | *Fail – Rehab Required* | *Deferred – Re-inspect Later*; drives QB field `Walkthrough Status`
Inspector Notes (General)	Long Text	Free-form summary; mapped to QB `Walkthrough Notes`
Inspector Signature	Signature	Captured on-device; stored as image in FastField; URL pushed to QB
Submission Timestamp	DateTime (auto)	Set by FastField on submit; mapped to QB `Walkthrough Date` if not already populated

6. Vendor Architecture

Vendors engaged during a rehab are stored in a SharePoint list (not as native QuickBase records) and referenced via a lookup or manual entry in QB. This approach leverages the existing SharePoint vendor management infrastructure and avoids duplicating master vendor data in QuickBase.

6.1 Storage Architecture

> **Design Decision – SharePoint as Vendor Master:** Vendor records live in a SharePoint list (*Parakeet Communities → Operations → Vendor Master*). QuickBase stores only the vendor's short name / ID and the associated bid amount on each Rehab Task. Full vendor detail (contact, license, insurance) is maintained in SharePoint.

OPTION	LOCATION	TRADE-OFFS
Option A – SharePoint Lookup (Selected)	SharePoint List	Single source of truth for vendor master; no QB licensing overhead for vendor contacts; existing compliance tracking remains intact
Option B – QB Native Vendor Table	QuickBase	Tighter pipeline; requires duplicate entry; license cost for additional QB records if >10k rows
Option C – Manual Free-Text in Tasks	QB Rehab Tasks	Lowest friction for launch; loses reporting and de-duplication; not recommended for production

6.2 Vendor Master (SharePoint) – Key Fields

FIELD	TYPE	NOTES
Vendor ID	Text (key)	Unique short code; referenced in QB Rehab Tasks `Vendor ID` field
Vendor Name	Text	Legal or DBA name
Trade Category	Dropdown	Plumbing | Electrical | HVAC | Roofing | Flooring | Painting | General Contractor | Cleanup | Other
Primary Contact	Text	Name of main contact person
Phone	Phone	Direct contact number
Email	Email	Business email address
States Served	Multi-select	State codes (FL, GA, SC, NC, MA, WV, MI, AL); used to filter vendor dropdown by community state
License #	Text	Contractor license number; state-specific
Insurance Expiry	Date	GL insurance expiration; flagged in SharePoint when within 30 days
Preferred Vendor	Yes/No	Flags top-tier, pre-vetted vendors; surfaced first in QB dropdown
Active	Yes/No	Inactive vendors are hidden from QB dropdown cascades
Notes	Long Text	Internal notes on reliability, pricing, past issues

6.3 QuickBase Integration Points

QB FIELD	SOURCE	NOTES
Vendor ID (Rehab Tasks)	SharePoint Vendor Master	Free-text entry or dropdown populated via Pipelines lookup to SharePoint; matched to Vendor ID
Vendor Name (Rehab Tasks)	Lookup from Vendor ID	Auto-populated via QB formula or Pipelines after Vendor ID is set
Vendor Phone / Email (Rehab Tasks)	Lookup from Vendor ID	Surfaced in task for field team reference; read-only in QB

6.4 Vendor Integration Method – Confirmed

> **O-WF002-NEW-05 (Resolved – v1.2):** Vendor sync method confirmed as **Option A – Power Automate**. A Power Automate flow will monitor the SharePoint Vendor Master list for changes (add / update / deactivate) and automatically push updates to the corresponding QB Vendors reference table. QB is the consumer; SharePoint remains the source of truth. The Power Automate flow configuration is a build-phase deliverable (IT / QB Admin). QB dropdowns on Rehab Tasks filter the Vendors table by Trade Category and State (see §8.2).

7. Communities Reference Table

The Communities table in QuickBase serves as the master community reference for all WF002 Rehab Records. Each record represents one active Parakeet community. The 68 communities below are sourced from the *dw_PDS* dataset (Reportable = Yes) and pre-loaded into QB as read-mostly reference data.

7.1 QB Communities Table – Field Definitions

FIELD	TYPE	NOTES

Short Name	Text (key)	Unique community code; primary key; used in cascading dropdowns and cross-table relationships
Community Display Name	Text	Human-readable full name shown in QB forms and reports
State	Text	Two-letter state abbreviation; used for vendor filtering
Vehicle / Fund	Text	Investment vehicle (Single Asset, Fund II, JREFI, JREFII, Kippy, Harpreet, Baker, Origins)
Property Type	Dropdown	ManufacturedHousing | RVCampground | Mixed
Age Category	Dropdown	All-Ages | 55+ | 50+
MH Lots	Integer	Total manufactured housing pad sites
RV Lots	Integer	Total RV/campground sites (0 if MH-only)
Total Units	Integer (calc)	Sum of MH Lots + RV Lots + Other Units
Occupancy %	Percent	Current physical occupancy; sourced from dw_PDS; updated periodically
2026 MH Lot Rent	Currency	Gross monthly MH lot rent for 2026; reference value for pro-forma comparisons
Active	Yes/No	Controls whether community appears in WF002 dropdown lists; default Yes for all 68

7.2 Active Communities – 68 Records

All 68 communities below are sourced from *dw_PDS* (Reportable = Yes, as of build date). RV Lots shown as 0 where community is MH-only. MH Rent shown as $0 for RV-primary communities.

SHORT NAME	COMMUNITY	ST	VEHICLE	TYPE	AGE CAT.	MH LOTS	RV LOTS	TOTAL	OCC%	MH RENT
CAMMHC	Cambridge	WV	Single Asset	MH	All-Ages	92	0	92	0%	$565

8. Cascading Dropdowns

WF002 uses cascading dropdown logic in QuickBase to reduce data entry errors and narrow selection lists to contextually valid choices. The primary cascade chain is **Community → Lot Number → (pre-populated unit data)**. A secondary chain filters the **Vendor ID** dropdown by trade category and by the community's state.

8.1 Primary Cascade: Community → Lot

FIELD	SOURCE	CASCADE LOGIC
Community	QB Communities table	Unrestricted dropdown of all Active communities (Short Name + Display Name). Drives the Lot Number cascade.
Lot Number	QB Lot Status table	Filtered to lots where `Community = [selected Community]`; shows only lots with Asset Status ≠ Occupied. This prevents creating rehab records for occupied lots.
Asset Status	Lookup from Lot	Auto-populated after Lot Number is selected; read-only on the Rehab Record form.
Unit Make / Model / Year	Lookup from Lot / Asset	Auto-populated if available in the QB Asset Status table; can be overridden by inspector.

8.2 Secondary Cascade: Task Trade → Vendor

FIELD	SOURCE	CASCADE LOGIC
Trade Category	Rehab Tasks form	User selects trade (Plumbing, Electrical, HVAC, Roofing, etc.). Drives the Vendor ID dropdown.
Vendor ID	SharePoint Vendor Master (via Pipelines)	Filtered to vendors where `Trade Category = [selected Trade]` AND `States Served includes [Community State]` AND `Active = Yes`. Preferred vendors appear first.
Vendor Name	Lookup from Vendor ID	Auto-populated from SharePoint Vendor Master after Vendor ID is set; read-only.

8.3 Tertiary Cascade: Rehab Stage → Allowed Status

FIELD	CONTEXT	CASCADE LOGIC
Rehab Status	Rehab Records	Available status values are constrained by the current Stage. Moving backward (e.g., Walkthrough → Triggered) is disallowed via form validation rule (Gate Rule G-RH-01).
Task Status	Rehab Tasks	Available transitions are constrained by parent Rehab Status: Task completion is blocked if Rehab Status = Triggered or Walkthrough (tasks cannot close before work phase begins).

8.4 Implementation Note

> **QB Cascading Dropdown Mechanism:** QuickBase cascading dropdowns are implemented using a *lookup field* paired with a *formula-based filter* on the child field. The parent field value is passed as a filter parameter to the child field's record picker. For the Vendor cascade, the filter is applied via QB Pipelines since the source (SharePoint) is external to QB. The exact Pipelines implementation is tracked in O-WF002-NEW-05 (§11).

9. Automations

WF002 includes twelve QuickBase Pipelines automations (A-RH-01 through A-RH-12). Each automation is a discrete, named pipeline. Automations are shown below in trigger-sequence order; several are co-dependent (e.g., A-RH-01 must fire before A-RH-02 is relevant).

ID	NAME	TRIGGER	ACTION & NOTES
A-RH-01	Rehab Record Creation	Manual (PM), TBD Report, or Move-Out event	Creates a new Rehab Record with `Rehab Status = Triggered`. Sets `Triggered Date` to today. Validates that Community and Lot Number are provided before creation. See §2.1 for trigger details.
A-RH-02	FastField Form Dispatch	Rehab Status changes to *Triggered*	Pushes a pre-populated FastField form link to the assigned inspector via email/push notification. Form pre-fills Community, Lot Number, and Rehab Record ID from the QB record.
A-RH-03	Walkthrough Status Sync	FastField form submitted	Receives FastField webhook payload; updates QB Walkthrough Record fields (Inspector, Date, Status, Photo URLs, Fail count). Sets `Rehab Status = Walkthrough Complete` if Overall Walkthrough Status = Pass or Fail – Ready.
A-RH-04	Bid Package Notification	Rehab Status changes to *Walkthrough Complete*	Sends email to PM and Rehab Coordinator notifying that the walkthrough is complete and the unit is ready for bid solicitation. Includes link to QB Rehab Record and summary of fail count.
A-RH-05	Rehab Task Auto-Creation	FastField form submitted (Fail items)	For each checklist item marked *Fail* in the FastField submission, creates one Rehab Task record linked to the parent Rehab Record. Sets `Task Name` from item name, `Task Status = Open`, `Trade Category` from item section mapping.
A-RH-06	Bid Approval Workflow	Rehab Status changes to *Bid Submitted*	Routes bid for approval based on `Total Bid Amount`: <$2,500.00 → no approval required; $2,500.00–$5,000.00 → Regional Manager approval; >$5,000.00 → Austin approval. Creates an approval task in QB assigned to the appropriate approver when required.
A-RH-07	Work Order Issuance	Rehab Status changes to *Bid Approved*	Generates and emails a formatted work order (QB report export) to each vendor with at least one approved Rehab Task. Sets `Work Start Date` = today + 3 business days (default; PM can override). Sets `Rehab Status = In Progress`.
A-RH-08	Task Completion Monitor	Rehab Task `Task Status` changes to *Complete*	Checks if all Rehab Tasks linked to the parent Rehab Record are *Complete*. If yes, sets `Rehab Status = Punch List` and notifies PM to schedule a final walkthrough.
A-RH-09	Punch List Re-Inspect Dispatch	Rehab Status changes to *Punch List*	Re-dispatches FastField form (same template) for the punch list inspection. Pre-fills previous fail items as context. Inspector re-assesses only previously failed items plus any new concerns.
A-RH-10	Rehab Completion & Financial Close	Rehab Status changes to *Complete*	Sets `Rehab Complete Date`. Calculates `Total Actual Cost` from sum of all Rehab Task `Actual Cost` fields. Calculates `Variance $` and `Variance %`. Updates Lot Status `Asset Status = Available`.

A-RH-11	Listing Handoff Notification	Rehab Status changes to *Complete*	Sends notification email to **Leslie and Tanya** with unit details, rehab summary, and total cost. **Does not auto-create a listing record**; notification only. See §2.2.
A-RH-12	SLA / Age Alert	Scheduled daily at 6:00 AM ET	Runs daily at 6:00 AM ET; checks all open Rehab Records for missed SLA milestones. Stage SLAs: Triggered → 3 business days for Walkthrough Scheduled; Bid Submitted → 5 business days for Bid Approved; In Progress → 30 calendar days for Completion. Escalation path: any SLA overdue by 7+ days → alert Ops Director; any Rehab Record open 30+ calendar days without Completion → escalate to Austin.

10. Gate Rules

Gate rules are enforced in QuickBase via form validation logic and Pipelines guards. They prevent invalid state transitions and ensure data integrity across the rehab lifecycle. Rules are evaluated in order; the first failing rule blocks the transition.

ID	GATE NAME	TRANSITION BLOCKED	CONDITION & ERROR MESSAGE
G-RH-01	No Backward Status	Any → earlier Stage	**Condition:** New Rehab Status has a lower stage sequence number than the current status. **Error:** "Status cannot move backward. Contact your administrator to revert if needed."
G-RH-02	Walkthrough Required Before Bid	Triggered → Bid Submitted	**Condition:** `Walkthrough Status` is blank or *Pending*. **Error:** "A completed walkthrough is required before submitting a bid."
G-RH-03	Bid Amount Required	Walkthrough Complete → Bid Submitted	**Condition:** `Total Bid Amount` is blank or $0. **Error:** "Total Bid Amount must be entered before submitting for approval."
G-RH-04	Approval Required Before Work	Bid Submitted → In Progress	**Condition:** `Bid Approval Status` ≠ Approved. **Error:** "Bid must be approved before work can begin. Current approval status: [Bid Approval Status]."
G-RH-05	All Tasks Must Close	In Progress → Punch List	**Condition:** COUNT of Rehab Tasks where `Task Status` ≠ Complete or Cancelled > 0. **Error:** "[N] task(s) are still open. All tasks must be closed before moving to Punch List."
G-RH-06	Punch List Pass Required	Punch List → Complete	**Condition:** `Punch List Status` ≠ Passed. **Error:** "Punch list inspection must be completed and passed before marking the rehab Complete."
G-RH-07	Actual Costs Required at Close	Punch List → Complete	**Condition:** Any Rehab Task with `Task Status = Complete` has blank `Actual Cost`. **Error:** "Actual cost must be entered for all completed tasks before closing the rehab."
G-RH-08	Occupied Lot Block	Record Creation	**Condition:** Selected Lot's `Asset Status` = Occupied at time of Rehab Record creation. **Error:** "This lot is currently occupied. A rehab record cannot be created for an occupied lot."

11. Open Items

The following items require resolution before or during WF002 build. Each item is assigned an ID, owner, and target resolution date. Items are tracked in the project backlog; status is updated at each sprint review.

ID	DESCRIPTION	OWNER	TARGET DATE	NOTES / OPTIONS
RESOLVED **O-WF002-NEW-01**	Asset Disposition Review Meeting – Trigger Source Identified	Asset Management	08/18/26	**Resolved v1.2.** The upstream trigger is the weekly Monday Asset Management meeting. Participants: Asset Mgmt, Ops, Construction, Sales. Dispositions: Rehab / Demo / Turn for Sale. Currently runs outside QB. Meeting recorder enters disposition outcome in QB; A-RH-01 fires when disposition = Rehab. *Whether to bring this meeting into QB as WF003 is open – see Q-037 below.*
OPEN **O-WF002-NEW-02**	FastField Form Build	Ops / FastField Admin	TBD	The FastField form (§5) must be built and published. 37 checklist items with photo fields, calculated fields, and signature. Requires FastField account access and QB Pipelines webhook configuration for sync back to QB.
RESOLVED **O-WF002-NEW-03**	Bid Approval Thresholds	Austin	08/19/26	**Resolved v1.3 (D-034).** Confirmed thresholds: <$2,500.00 → no approval required; $2,500.00–$5,000.00 → Regional Manager approval; >$5,000.00 → Austin approval. Implemented in A-RH-06.
RESOLVED **O-WF002-NEW-04**	SLA Thresholds (A-RH-12)	Austin	08/19/26	**Resolved v1.3 (D-035).** SLA thresholds confirmed: Walkthrough Scheduling = 3 business days from Rehab record creation; Individual Task Completion = 5 business days from assignment; Full Project Completion = 30 calendar days from Rehab record creation. Implemented in A-RH-12. Escalation path: 7 days past SLA → Ops Director; 30 cal days without Completion → Austin (D-033).
RESOLVED **O-WF002-NEW-05**	Vendor SharePoint Integration – Method Confirmed	IT / QB Admin	08/18/26	**Resolved v1.2.** Vendor sync method confirmed as **Power Automate (Option A)**. A Power Automate flow monitors the SharePoint Vendor Master list for changes and auto-pushes updates to the QB Vendors reference table. SharePoint remains the source of truth; QB is the consumer. Build deliverable: Power Automate flow configuration (IT / QB Admin). See §6.4.
RESOLVED **O-WF002-NEW-06**	Lot Status Values – Confirmed from Unit Type Listing	QB Admin	08/18/26	**Resolved v1.2.** Lot Status table (§4A) will be built new in QB. 16 Lot-X values confirmed from Unit Type Listing.xlsx (RM-aligned). See §4A for full value set. Build from scratch using the values in §4A; no existing QB table to migrate.

RESOLVED **O-WF002-NEW-07**	Photo Storage Architecture	Austin	08/19/26	**Resolved v1.3 (D-036).** Option D selected: QB file attachment field (quick access alongside the Rehab Record) + SharePoint document library push (archival and compliance). FastField webhook payload delivers photo URLs; A-RH-03 pipeline writes photo files to both QB attachment field and SharePoint. Build deliverable: Power Automate flow or QB Pipeline step to push photo files to SharePoint (IT / QB Admin).
RESOLVED **O-WF002-NEW-08**	Listing Handoff Recipient List	Austin	08/19/26	**Resolved v1.3 (D-037).** Listing handoff notification recipients confirmed: **Leslie and Tanya**. A-RH-11 sends to both on Rehab Status = Complete. Full email addresses to be provided at build phase.
RESOLVED **Q-037**	WF003 Asset Disposition Review – Bring into QB Now or Later?	Austin	08/19/26	**Resolved (D-025).** WF003 Asset Disposition Review is being designed now. WF003 v1.1 spec complete and approved as of 08/19/26. WF003 is the upstream trigger for WF002 – A-RH-01 fires automatically when a WF003 Disposition Item is set to Rehab.
RESOLVED **Q-039**	Unit Types Reference Table – Add to QB?	Austin	08/19/26	**Resolved (D-027).** No separate Unit Types reference table. Unit Type = Lot Status – the same field in QB. The 16 Lot Status values from Unit Type Listing.xlsx serve both purposes. No additional QB table required.

12. Version History

VERSION	DATE	AUTHOR	CHANGES
v1.0	08/18/26	Parakeet Communities	Initial release. Established WF002 scope, 9-stage pipeline, QB table definitions (Rehab Records, Rehab Tasks, Walkthrough Records), FastField form structure (37 checklist items), cascading dropdown logic, 12 automations (A-RH-01 through A-RH-12), 8 gate rules (G-RH-01 through G-RH-08), and 68-community reference table from dw_PDS.
v1.3	08/19/26	Parakeet Communities	**Supersedes v1.2.** All remaining open items resolved – spec status promoted to Approved. Key changes: • §9 A-RH-06: Bid approval thresholds updated – <$2,500.00 = no approval; $2,500.00–$5,000.00 = Regional Manager; >$5,000.00 = Austin. O-WF002-NEW-03 closed (D-034). • §9 A-RH-11: Listing handoff notification recipients confirmed – Leslie and Tanya. O-WF002-NEW-08 closed (D-037). • §9 A-RH-12: Escalation path updated – 7 days past SLA → Ops Director alert; 30 calendar days without Completion → Austin escalation. 60-day threshold removed. O-WF002-NEW-04 and Q-030 closed (D-033, D-035). • §4C Days In Rehab field: corrected alert reference from A-RH-11/A-RH-12 at 30/60 days → A-RH-12 with 7-day Ops Director / 30-day Austin thresholds. • §3 Stage 8: corrected Lot Status reference and listing notification recipients to Leslie and Tanya. • §11 Photo storage architecture confirmed – Option D: QB attachment + SharePoint push. O-WF002-NEW-07 closed (D-036). • §11 Q-037 and Q-039 closed – WF003 v1.1 approved (D-025); Unit Type = Lot Status, no separate table (D-027).

v1.2	08/18/26	Parakeet Communities	**Supersedes v1.1.** Key changes in this revision: • §2 Trigger updated: **Asset Disposition Review Meeting** identified as the upstream trigger — weekly Monday meeting run by Asset Management (Ops, Construction, Sales). Dispositions: Rehab / Demo / Turn for Sale. WF003 (proposed) would bring this into QB. O-WF002-NEW-01 resolved. • §6.4 Vendor sync method confirmed: **Power Automate (Option A)** — SharePoint → QB automated flow. O-WF002-NEW-05 resolved. • §4A Lot Status: replaced 8 placeholder values with **16 RM-aligned values** from Unit Type Listing.xlsx. O-WF002-NEW-06 resolved. • §4B Asset Status: replaced 7 placeholder values with **25 RM-aligned values** from Asset Status.xlsx. • Added open items **Q-037** (WF003 — bring Asset Disposition meeting into QB?) and **Q-039** (Unit Types reference table). • New reference: Unit Type Listing.xlsx (36 unit types) noted as candidate for a QB Unit Types reference table — Q-039 tracks decision.
v1.1	08/18/26	Parakeet Communities	**Supersedes v1.0.** Key changes in this revision: • Added **Financial Tracking** subsection to §4C Rehab Records (Bid Amount, Approved Budget, Actual Cost, Variance fields with green border treatment) • Added **§4A Lot Status** and **§4B Asset Status** as explicit reference tables (were implicit in v1.0) • Added **§6 Vendor Architecture** section documenting SharePoint as vendor master (vs. native QB in v1.0 draft) • Updated §5 FastField form: **photo capture per checklist item** (37 optional photo fields added; total form elements = 82) • Updated §2 trigger logic: TBD Report and Move-Out triggers clarified as separate paths; Manual trigger documented as always-available • Clarified §2.2 Listing Handoff: **notification only** (A-RH-11); does not auto-create a listing record in any downstream system • Added 8 Open Items (§11) for items requiring resolution before build completion • Vehicle / Fund data in §7 corrected to match dw_PDS source (e.g., Applegate = JREFI not Baker; Crystal Acres = Kippy not JREFI)
