Chat notes

What determines whether lease execution is digital vs manual?
Default to digital e-signature when the resident has a TWA account; use print-and-upload only when the resident requests a printed version or lacks TWA access.
Natalie Magurne 06/23/2026

Should the Lease Renewal process include the Massachusetts 72-hour disclosure requirement before signing?
Yes. Add a Massachusetts compliance gate after generating the lease PDF: if Massachusetts, confirm the disclosure package was delivered at least 72 hours prior; if not, deliver the package and wait/schedule signing at least 72 hours later before proceeding.
Natalie Magurne 06/23/2026

Should the Lease Renewal process include a Move-Out SOP branch when a resident indicates intent to vacate?
Yes. Add a decision after Receive Renewal Notice: if resident intends to vacate, initiate the Move-Out SOP in parallel while continuing the renewal workflow.

Lease Renewal

Lease Renewal
Owner: Natalie Magurne
Last Updated: Jun 23, 2026
Scope: Covers how Parakeet Communities issues renewal/rent-increase notices, generates lease renewals in Rent Manager Express, executes signatures (digital or manual), activates leases, and confirms billing schedule updates; starts when Asset Management issues a renewal/rent-increase notice or a lease expiration is approaching, and ends when the lease is active in Rent Manager and the billing schedule is updated/confirmed.

End

Lease Renewal and Signature Workflow

Diagram information
This diagram represents the end-to-end lease renewal and rent increase process across Asset Management, Community Manager, Regional Manager, Director of Operations, and Resident roles. It covers issuing notices, document generation (automated and manual), template validation, signature workflows (e-sign and in-person), tracking unsigned leases, escalations, compliance checks, and updating billing in Rent Manager.

Lease Renewal and Execution SOP
1. Start the process by issuing the Renewal/Rent Increase Notice.
2. Upload proof of mailing to the tenant's Rent Manager history & notes.
3. Asset Management receives the renewal notice and ensures rent amount is correct in Rent Manager.
    3.1. If rent does not match approved notice, notify Asset Management of the discrepancy and correct the rent amount.
4. Community Manager reviews the Rent Increase/Expiring Leases list and validates tenant status and account details.
5. Confirm approved rent amount from the uploaded notice.
6. If rent amount matches the approved notice, open the tenant profile in Rent Manager Express.
7. Select Renew Lease (not New Lease) in the tenant profile.
8. Select the property lease template.
    8.1. If template not found, contact Regional Manager for template help and obtain/confirm correct template.
9. Enter lease details (dates, charges, rent) into the template.
10. Save the lease in Rent Manager.
11. Choose execution path: generate lease document PDF (automated) or generate PDF manually.
12. Generate lease document PDF.
13. Review merge fields for accuracy.
14. Publish the document.
15. Enable e-signature and assign signers, or print the lease for in-person signatures.
16. Send lease for signature (e-sign) or obtain signatures in person.
17. Track signature status and send reminders as needed.
18. Weekly: run report to identify unsigned/incomplete leases and send follow-up reminders until resolved.
19. If any resident refuses to sign after outreach, Regional Manager contacts the resident.
    19.1. If contact fails and resident still refuses, complete Tenancy Lease Acknowledgment and upload it to the tenant profile.
20. If resident signs the lease within 30 days, mark lease completed, scan/upload signed lease to tenant profile, and set lease status to Active.
21. If the lease is not signed within 30 days, notify the Regional Manager of the unsigned lease for escalation.
22. Regional Manager conducts periodic spot-checks and monthly portfolio compliance reviews.
    22.1. If compliance issues are found, escalate to Director of Operations.
23. Director of Operations resolves escalations with Asset Management and ensures any required billing schedule updates are made in Rent Manager.
24. Confirm billing schedule is correct in Rent Manager and update the billing schedule if needed.
25. End the process after billing schedule confirmation and portfolio compliance review completion.
