Internal Rehab Process

**Internal Rehab Process**
**Owner:** Natalie Magurne
**Last Updated:** Aug 28, 2026
**Scope:** Covers the internal rehab workflow from Asset Management flagging a unit for internal rehab through GL setup, cost tracking in Rent Manager, rehab completion close-out, and handoff to Sales via the Home Market Jotform.

Asset Management
Regional Manager
"Community Manager / District Manager (CM/DM)"
"Director of Operations (DOO)"
Accounting
Maintenance
Sales
Start
Complete Unit Turn and photos Sheet (before TBD call)
Lead TBD call; review Unit Turn Sheet
Flag unit as Internal Rehab & create issue in Rent Manager (Issue #)
Finalize scope of work
Contact Accounting with issue # to request GL codes
Provide GL codes by charge type
Enter GL codes in UDF 'GL — Total Cost' on Rent Manager issue
Complete rehab work per Unit Turn Sheet
Flag scope change to Regional Manager
Yes
Did Maintenance identify a scope change?
No
Enter materials/supply purchases in Rent Manager (issue#, GL)
Enter purchases
Enter Ramp card charges in Rent Manager; memo includes GL code
Spot-check charges in Rent Manager
Review Rehab Walkthrough form
Walk unit & submit Rehab Walkthrough Jotform
Re-walk after fixes and re-submit Rehab Walkthrough
Are all scope items complete?
Yes
No
Send punchlist to Maintenance with deadline
Complete punchlist items; notify CM/DM
Confirm all costs & Ramp charges entered with GL codes
Review all charges; escalate discrepancies
Confirm all charges are correctly GL coded
Resolve discrepancies with Accounting/DOO
No
Has Accounting confirmed GL coding is correct?
Yes
Mark rehab complete in Rent Manager (after Accounting confirmation)
Submit Home Market Jotform
Receive Home Market Jotform and list home for sale
End

### Asset Rehab & GL Coding Workflow

**Diagram information**
This diagram maps the end-to-end asset rehab process across roles (Regional Manager, CM/DM, DOO, Accounting, Maintenance, Sales). It shows start-to-end steps: creating issues in Rent Manager, confirming issue numbers, defining and executing scope, entering purchases and GL codes, validating GL coding, resolving discrepancies, and finalizing listing or completion.

**Asset Rehab and GL Coding SOP**
1. Start the process by completing the Unit Turn Sheet before the TBD call.
2. Lead the TBD call and review the Unit Turn Sheet.
3. Flag the unit as Internal Rehab and create an issue in Rent Manager (capture Issue #).
4. Confirm the issue number exists in Rent Manager.
    4.1. If not confirmed, confirm and re-check Rent Manager.
5. If issue exists, Regional Manager finalizes the scope of work.
6. Regional Manager sends the punchlist to Maintenance with a deadline.
7. Maintenance completes rehab work per the Unit Turn Sheet.
8. Maintenance completes punchlist items and notifies CM/DM.
9. CM/DM re-walks after fixes and re-submits the Rehab Walkthrough.
10. CM/DM walks the unit and submits the Rehab Walkthrough Jotform.
11. Upon Rehab Walkthrough submission, evaluate whether all scope items are complete.
    11.1. If scope items are incomplete, Regional Manager sends punchlist to Maintenance (repeat steps 6–10).
    11.2. If scope items are complete, confirm all costs and Ramp charges are entered with GL codes.
12. CM/DM enter materials/supply purchases in Rent Manager (include issue # and GL if available).
13. CM/DM enter Ramp card charges in Rent Manager; include memo with GL code.
14. Regional Manager spot-checks charges in Rent Manager and reviews the Rehab Walkthrough form.
15. Regional Manager reviews all charges and escalates discrepancies to Accounting/DOO.
16. If Maintenance identifies a scope change, flag the scope change to the Regional Manager and Regional Manager updates scope (return to step 5 as needed).
17. Regional Manager marks rehab complete in Rent Manager when ready.
18. Regional Manager submits Home Market Jotform to Sales to list the home for sale.
19. Sales receives the Home Market Jotform and lists the home for sale; process ends.
20. Regional Manager confirms issue number exists in Rent Manager again as needed.
21. Regional Manager finalizes scope and contacts DOO to request GL codes by charge type from Accounting.
22. DOO contacts Accounting with the issue # to request GL codes.
23. Accounting provides GL codes by charge type to DOO.
24. DOO enters GL codes in the UDF 'GL — Total Cost' on the Rent Manager issue.
    24.1. If GL codes are not entered in Rent Manager UDF, DOO must enter them.
25. If GL codes are entered in Rent Manager UDF, proceed to confirm all charges are correctly GL coded with Accounting.
26. Accounting confirms whether all charges are correctly GL coded.
    26.1. If Accounting confirms GL coding is correct, Regional Manager marks rehab complete in Rent Manager (return to step 17).
    26.2. If Accounting indicates incorrect GL coding, resolve discrepancies with Accounting/DOO; once resolved, Accounting re-confirms (return to step 26).
27. If a valid issue number is not confirmed in Rent Manager at any check, hold invoices/charges and notify the Regional Manager.
28. After GL confirmation and rehab completion, confirm closure and end the process.
