Lender Repossession & Backstop Purchase Decision – Workflow

Lender Repossession & Backstop Purchase Decision – Workflow
Owner: Natalie Magurne
Last Updated: Jul 11, 2026
Scope: Covers how Parakeet Communities receives lender repossession notices, assembles a decision data pack, makes a backstop/repurchase decision, responds to the lender before the expiration deadline, initiates payment, and completes a post-mortem recap for all properties with a lender backstop/repurchase obligation.

Lender Repossession Decision & Response Flow

Diagram information
This diagram maps the end-to-end process for handling lender repossession notices: receiving notice, compiling required data across teams (Accounting, Sales & Marketing, Operations, Owner), making a purchase decision before lender expiration, executing the chosen purchase option, and conducting a post-mortem. Key components: initial receipt and group notification, internal deadlines (2 weeks before lender expiration), data pack compilation, decision escalation and selection (Austin & David), execution of purchase options (10% down or full payoff), and a post-mortem recap.

Repossession Notice Handling SOP

1. Start: Receive repossession notice (customer name, loan #, serial #, purchase price, options, lender expiration).
2. Same day: Forward notice to full group distribution list.
3. Accounting: Log home details (customer, loan #, serial #, purchase price, lender expiration).
4. Accounting: Calculate internal decision deadline (2 weeks before lender expiration) and email group.
5. If lender expiration < 2 weeks, compress timelines, notify group, and escalate to David same day.
6. Sales: Prepare Sales 1-page summary (demand, velocity, pricing, funnel) — due within 3 business days.
7. Operations: Confirm unit condition, estimated turn time, resident ledger status — due within 3 business days.
8. Accounting: Confirm credit line capacity for each purchase option — due within 3 business days.
9. When data elements are missing by internal decision deadline, Sales escalates missing data to David.
   9.1 Sales compiles full data pack (lot status, prospect data, sales/rent velocity, turn costs, Sales 1-pager, Finance capacity, Ops condition).
   9.2 Deliver completed data pack to Austin & David.
10. Owner & Accounting: Review full data pack together by internal deadline.
11. If data pack is complete by internal deadline, proceed.
12. If a purchase option is selected by the internal deadline, Accounting emails lender with chosen option before lender expiration.
13. If no purchase option selected by internal deadline, Leslie escalates to David; Austin & David decide ASAP.
14. Execute chosen option:
   14.1 If Option 1 or 2 (Spec Inventory or Rental Asset) — initiate 10% down payment and record action.
   14.2 If Option 3 (Full Payoff) — initiate full payoff and record action.
15. After execution, proceed to post-mortem. Co-lead post-mortem recap and compile findings.
16. Sales co-leads post-mortem recap and emails findings to the group.
17. End: Process complete.
