Title: TBD Reporting Process
Applies To: Operations Team, Regional Team, Community Managers, Asset Management
Department: Operations
System Used: Rent Manager / Park Owned Asset Folder

PURPOSE

The TBD reporting process is used to track all park-owned homes once a resident has moved out and the home has been returned to company possession. This SOP establishes a standardized process for documenting, tracking, reviewing, and storing information related to vacant park-owned homes.

The process ensures:

- Vacant park-owned homes are properly tracked
- Homes are added to the TBD list timely
- Required unit documentation is completed
- Weekly reporting and follow-up are maintained
- Files are organized and stored correctly for review and planning
- No vacant unit is missed in the reporting cycle

SCOPE

This SOP applies to all Parakeet personnel involved in the move-out, reporting, inspection, and documentation process for park-owned homes, including:

- Community Managers
- Asset Management Team
- Operations Admin
- Regional Team

RESPONSIBILITIES

Community Manager Responsibilities

- Request resident move-out completion from Asset Management
- Complete all required unit documentation
- Take and upload required interior and exterior photos
- Complete the Unit Turn Inspection Sheet
- Ensure documentation is completed timely

Asset Management Responsibilities

- Process resident move-outs in Rent Manager
- Ensure homes populate correctly on the TBD list

Operations Admin Responsibilities

- Pull the weekly TBD report from Rent Manager
- Circulate the report to the appropriate Regional Team members
- Maintain weekly reporting cadence

Regional Responsibilities

- Review the TBD report with the property team
- Follow up with Managers regarding missing documentation
- Ensure all completed documentation is saved in the proper Park Owned Asset folder
- Maintain organization of files for review and planning purposes

PROCEDURE

Phase 1: Move-Out Request

Objective:

- Initiate the process for adding vacant park-owned homes to the TBD reporting list.

Steps:

1. Once a resident has moved out, the Community Manager must request move-out completion from Asset Management.
2. The request should be submitted promptly after possession of the home has been returned to the company.
3. This step is required in order for the unit to populate on the TBD report in Rent Manager.

Phase 2: Move-Out Processing

Objective:

- Process the move-out in the system so the home can be tracked through the TBD reporting process.

Steps:

1. Asset Management receives the move-out request.
2. Asset Management processes the resident move-out in Rent Manager.
3. Once completed, the home will appear on the TBD list and become part of the weekly reporting cycle.

Phase 3: Weekly TBD Report Distribution

Objective:

- Generate and distribute the weekly TBD report for tracking and follow-up.

Steps

1. Operations Admin pulls the TBD report from Rent Manager on the weekly reporting schedule.
2. The report is circulated to the appropriate Regional Team members.
3. The TBD report serves as the active working list for all vacant park-owned homes requiring documentation and review.

Phase 4: Regional Review and Follow-Up

Objective:

- Ensure all homes on the TBD report are actively being documented and reviewed.

Steps:

1. Regionals review the TBD report with the property team.
2. Confirm each listed home has documentation either completed or in progress.
3. Follow up with Community Managers regarding:
    - Missing photos
    - Incomplete inspection sheets
    - Delayed documentation
4. Ensure no home is missed during the weekly reporting cycle.

Phase 5: Unit Documentation Completion

Objective:

- Document the overall condition of each vacant park-owned home.

Required Documentation:

- For every home appearing on the TBD report, the Community Manager must complete the following:

Photo Requirements:

Interior Photos
Photos should clearly show:

- Living room
- Kitchen
- Bedrooms
- Bathrooms
- Flooring Condition
- Walls and Ceilings
- Major damages or housekeeping concerns

Exterior Photos
Photos should include:

- Front of home
- Rear of home
- Left side
- Right side
- Yard condition
- Any visible exterior damages

Inspection Requirements:

- A completed Unit Turn Inspection Sheet must also be included.

Documentation Standards:

1. Photos must be clear and readable.
2. Photos must accurately reflect the condition of the home.
3. Any visible damages, deferred maintenance, or concerns should be documented.
4. Inspection sheets must be completed in full for review and next-step planning.

Phase 6: File Storage and Organization

Objective:

- Ensure all completed documentation is properly stored and accessible.

Steps:

1. Once documentation is completed, the Regional is responsible for saving all files in the appropriate Park Owned Asset folder.

2. Required files include:
    a. Interior photos
    b. Exterior photos
    c. Completed Unit Turn Inspection Sheet
3. Files must be:
    a. Saved in the correct folder location
    b. Clearly labeled
    c. Organized for easy review and reference
4. Documentation should support future planning, repairs, rehab decisions, or asset review.

STANDARD REQUIREMENTS

Every park-owned home appearing on the TBD report is expected to have complete supporting documentation attached to the file.

At minimum, each file must include:

- Interior photos
- Exterior photos
- Completed Unit Turn Inspection Sheet

All documentation must be saved in the appropriate Park Owned Asset folder. This process is expected to be completed weekly as part of the standard operating process for vacant home management.

ACCOUNTABILITY

Community Managers
Accountable for:

- Requesting move-out completion
- Completing required unit documentation timely

Community Managers
Accountable for:

- Requesting move-out completion
- Ensuring homes appear on the TBD list

Operations Admin

Accountable for:

- Running the weekly TBD report
- Distributing the report to the appropriate teams

Regionals

Accountable for:

- Following up with property teams
- Ensuring documentation is completed
- Saving files in the correct Park Owned Asset folder
- Maintaining organized records for review and planning

Phase 6: Utility Verification & Activation

For every home or lot appearing on the TBD report, Managers and Maintenance must verify the status of:

Electric
Water
Sewer / Septic
Gas (if applicable)

The following must be confirmed:

Is utility currently active?
Is there an existing meter?
Does service need reactivated or transferred?
Is a new utility connection or meter required?
Utility Request JotForm (Required)

Managers are responsible for completing the Utility Request JotForm for:

Rehab homes
New home delivery lots
Any vacant home requiring utility activation

The JotForm must include:

Community
Lot / Unit
Utility providers
Current utility status
Meter status
Requested activation date
Notes regarding missing utilities or infrastructure concerns
