Not sure if you want to talk to Austin here…

If the Accounting department no longer has control of the books and records for the property level entities for which we are formally a property manager for, then Parakeet Communities would have to formally terminate its relationship as the property manager of all assets outside of Parakeet MHC and Parakeet HoldCo II.

Lise from this point forward, David Berman no longer has any authorization to make any adjustments to any financials for any company or entity whatsoever everything must go through me. I would like to review all working papers for everything non-Parakeet that he has touched. I have copied him on this email so we understand the directive as well since he cannot reconcile books correctly he no longer has authorization.

Just throwing this to the top of the inbox since I'm meeting with Post at 3:30 and this just needs to be ironed out ahead of that convo. **If we need more time to discuss this, I can push back the Post meeting to tomorrow but this needs to be resolved ahead of Cambridge tax returns being ironed out.**

Specifically on the tabs for "KEET to CAMMHC" and "CAMMHC to KEET" there is ledger detail for charges in which Cambridge owes money to KEET recorded by all parties. Looks like the payables were effectively cleared out at year end 2023 but then Cambridge borrowed $150K from Parakeet entities through direct cash transfers that took place in Q1 and Q3 2024 and then there was another $79,827 of Ramp charges over the past several years for Cambridge that were never reimbursed to KEET.

If we think the record keeping back in 2024 was improper and these charges never happened, that's fine but we need to talk about it and update books accordingly. We have corresponding Ramp detail for all the credit card charges over the years so if we believe that activity to have been misassigned dating years back, it will just need to be updated to the appropriate entity or entities it related to.

Assuming these cash events took place back in 2024, one of two things will happen:

- **Cambridge will need to reimburse Parakeet entities for the funds it owes**
- **Parakeet MHC will be taking a loss as we write off receivables in 2026**

Happy to talk this through if we think the ledger detail recorded back in 2024 is flat out wrong. If that's the case, Parakeet will again just need to take the hit in 2026 as the corresponding activity for Parakeet was also in the books back from 2024.

Looking for guidance here though as this all predates anybody in the current department who could say if the 2024 activity was erroneous and we additionally can't make the decision for Parakeet MHC to take the hit here in 2026 without that being confirmed by both of you.

Best,
David

Moe and I have been working on this one to clear the decks of the funds' interco balances, and attached is a summary of all the payable balances to PC and KEET from non-Parakeet entities excluding currently managed assets.

The first tab is a lead sheet summary, and the second tab is the full ledger detail of AR and AP on both sides to confirm the accuracy of balances and provide underlying detail.

We can discuss in more detail tomorrow.
